### Stork Report

Please welcome a new little Steeplechase resident. Blaise Joseph Bauman was born on December 30, 2005. He was 6 ½ weeks early and weighed 4 lbs. 6.7 oz. Blaise was 18 inches long. After spending only one week in the hospital, he is home with his family, growing fast and doing well.

### Pool News

There are lots of ongoing projects at the pool this spring – if you would like to volunteer for the pool committee please contact Jinnie Kelley at 832-922-8030. The next Pool Committee meeting is Thursday, April 27<sup>th</sup> at 7pm in the clubhouse. The pool will open for the season on Saturday, May 20<sup>th</sup>.

This spring the Pool Committee will be deleting old non-activated pool ID cards from our system. Cards issued in 2002 and 2003 that have not been renewed since will be deleted unless we hear from you; for more information log on to [Steeplechasetx.com](http://Steeplechasetx.com) or drop a note in the club mailbox in the pool parking lot.

### Steepleway Boulevard Fence Update

As of the writing of this newsletter, documents have been sent to perimeter fence owners in Greentree, Saddlebrook, Churchill and Cobblestone seeking their agreement to have that fence replaced. The fence license and reimbursement agreements must be received from those homeowners before construction can begin.

The final fence specifications are as follows:

1 x 6 x 6 Pickets (Western Red Cedar), Full ¾" x 5-1/2 x 6 pickets  
6 x 4 Exposed Posts, 7' on Center (Treated Pine), 10' posts  
3 Rails 2 x 4 installed vertical for optimal structure (Treated Pine)  
2 x 6 Cap (Western Red Cedar)  
1 x 2 Trim (Western Red Cedar)  
2 x 12 Rot Board (Treated Pine) beveled top (for water drainage)  
Continuous Cap  
Sealed on both sides with Cedar Color Sealant

While the fence company is in Steeplechase they will replace other interior fencing at a contractors rate.

## Keep Our Street Lights Working And Bright

Just a reminder it is very easy for homeowners to report problems with street lights in our subdivision. All you need to do is go to <http://www.centerpointenergy.com/outage/> and you can submit an online request for Center Point Energy to repair the street light. This is a very easy process all they need is the approximate address of the street light and the six digit number located on the light post. After the request is made, Center Point will replace the bulb in several days. Also some of the street lights in are subdivision are working but are very dim due to the age of the bulbs. To report that type of problem, check “Dim Light” in the category asking for a description of the problem.

## CFMC Volunteer Program

Cypress Fairbanks Medical Center has an ongoing need for Volunteers who can make a long-term commitment.

Duties of the Volunteer vary from assignment to assignment but the over all need is to assist the staff, the patients and their families in whatever way they can to make their time at CFMC a pleasant experience. Sometimes it is just a smile and a friendly hello that reassures them we truly care about them. The Volunteer Program requires an orientation lasting from 8am to about 3:30pm. During this time you will learn about the hospital and your responsibilities.

The Volunteers at CFMC are first dedicated to assisting the patients and staff but it goes further. The Gift Shop is operated and maintained entirely by the Volunteers. The majority of the proceeds go our scholarship fund. Each year scholarships are awarded to students in the Cy-Fair area who plan to enter the medical field. We awarded five scholarships last year and hope to award more this year. We also provide assistance to other charitable funds in our community during the year such as the Toys for Tots program and the Disaster Relief Fund.

If you have 4 hours or more a week to volunteer and enjoy working with others – please consider joining us. Applications are available in our Gift Shop in the main lobby of the Hospital. If you would like to speak directly with someone, please call 281-897-3186.

## No Silver Bullet To Solve Traffic Congestion

If you had 3.7 billion hours to spend, how would you spend it? If you're like most Americans, one way you help spend the time is by sitting in freeway traffic jams. According to Dr. David Schrank of the Texas Transportation Institute (TTI), traffic delays totaled 3.7 billion hours in 2003.

Schrank was in Houston on March 2 to present an overview of TTI's 2005 Annual Urban Mobility Report to members of the Cy-Fair Houston Chamber of Commerce Transportation Committee. The report is a nationally known study of mobility and traffic congestion on freeways in 85 U.S. cities. The study measured trends from 1982 through 2003, the most recent year for which data is available.

Congestion on freeways is getting worse and is costing Americans \$63 billion a year, he said.

Among the problems are traffic jams, unreliable travel times, long waits at traffic signals, navigating through construction zones, accidents and relatively few viable travel options other than driving on the freeway.

"The problem is getting worse," Schrank said. "The number of urban areas with more than 20 hours of delay per peak traveler has grown from five in 1982 to 51 in 2003."

In Houston, major freeway construction in the 1980s and 1990s has resulted in a slower growth of congestion than that of several other major metropolitan areas in Texas, he said.

Traffic congestion is a fact of life that won't go away as long as Americans commute to and from work between 8 a.m. and 5 p.m., Schrank said. But he added that reducing congestion to a manageable level is possible.

"If we can have our system be reliable, we would be happy with that,"

he said. "Reliability is the buzzword. We are not necessarily willing to live with the congestion that is out there now."

But there's no silver bullet for solving the problem.

"We can't build our way out of it," Schrank said. "We have only been able to build 40 to 42 percent of the road capacity we need to solve the problem. Carpooling and public transportation are also not the entire solution, but they are part of the solution."

HOV lanes have been an effective method of helping to ease the traffic burden, he said.

"HOV lanes carry a lot of people and do what they need to do," Schrank said. "Houston is a prime example of how they can work."

The Chamber has long been an advocate for a variety of mobility solutions and has been instrumental in such projects as the underpass on FM 1960 at Texas 249. Currently, the Chamber, through its 290 Passenger Rail Coalition, is leading an effort to bring commuter rail to the 290 corridor – a project that Schrank praised as being a proactive effort that could become part of the overall solution to reduce congestion on U.S. 290.

One traffic management tool that has been proven effective in studies but is only lightly used in Houston is metered freeway entrance, he noted.

The solution is everything – multi-modal and managing everything very aggressively," Schrank said. "We can't stop the growth of congestion, but we can improve reliability and provide more options."
