

# The HOME FRONT

June 2008

Official Publication of Legends Ranch Property Owners Association

Volume 2, Issue 6

## Spring Fling

Legends Ranch residents enjoyed a first-class brunch at our first annual Spring Fling! Special thanks to CM Florist for our gorgeous buffet centerpiece and The Linen House for our exquisite table and chair linens! The York Junior High Orchestra entertained our

ladies with an outstanding performance. Our resident Steering Committee Members, including Annisa White, Jennifer Gayer, Michelle Garcia and Desireah Riley, created a truly unforgettable event!

## Fireworks Prohibition in the Deed Restrictions

The Board asks that residents refrain from celebrating the holidays with the use of fireworks and firework displays. This not only poses a nuisance and disturbance to your neighbors, it also leaves a messy aftermath to be cleaned up. Thank you for helping to keep Legends Ranch community firework free!

## June Landscaping

*Submitted by Ron Kerwin*

Make Father HAPPY; give him a lawn service covering the HOT summer months as a gift he will REALLY appreciate!! We'd be glad to help.

It is getting hotter out; plan your lawn/garden work for early morning or evening to avoid the heat of the day. Make sure you drink plenty of non-alcoholic fluids, preferably water, to keep from becoming dehydrated.

Plan your mowing schedule around the growth of your lawn. You should not mow more than 1/3 of the blade length off at a time. IF you water or fertilize too much, you will generate excessive growth. This will require more frequent mowing to avoid cutting off more than 1/3. If you postpone mowing, you will be damaging your lawn, generating excess clippings which will require more of your time to mow over them multiple times, and you will do your small mower engine harm by trying to mow too much grass with its smaller horsepower. With proper fertilization and watering, weekly mowing should be adequate; there will be exceptions however.

You can fertilize again this month with a 3-1-2-ratio fertilizer or 4-1-2; try to get it with a minimum of 50 % slow release nitrogen to stretch out its benefits. Water the granular fertilizer in soon after application. You can water your patio plants and hanging baskets with a diluted 20-20-20 water-soluble fertilizer. Try to use filtered or distilled water for these plants and baskets to reduce the chlorine getting to the plants.

Canopy your trees to allow more sunlight to get to the lawn grasses underneath. Low tree canopies will not allow grass to survive. You want the lower branches removed anyway for safety reasons while mowing. You don't want to get poked in the eye.

On Red-tip Photinia and Indian Hawthorne's watch for maroon colored spots on the leaves. This indicates a fungal leaf spot and could be fatal to the shrubs if left unattended.

Apply a fungicide, Banner or Daconil as soon as you can. Powdery mildew on roses, crape myrtles, eunonymus and zinnias in late spring can be treated with a funginex spray weekly.

Trim your spring flowering shrubs now and then leave them alone. Your Indian Hawthornes and other spring flowering shrubs are done blooming. Now is the time to trim them back. After you do this, do not trim them again until after they bloom next spring. Trimming them later in the year may result in your removing the flower bud heads for next year. June bugs DO NOT mean to treat for their larva, grub worms. Treatment is only effective in late July/early August IF you have grubs. Spider mites can be treated with miticides, insecticidal soaps or just a blast of water from your hose.

## A Hyperactive Nightmare on Two Legs – Does This Sound Like Your Child?

Submitted by: Jeannette Quickenden S.A.C. Dip, MIGHT, AADP

Screaming fits, temper tantrums, hyperactive, letters home from school, lack of focus, antisocial and unacceptable behavior. Is your child? I so understand your situation. My young daughter can be a big pain depending on what she has consumed.

There could be a very simple solution to these behavioral issues. It is now widely accepted that food additives and delayed patterns of food allergies play an important role in causing learning and behavioral problems both in children and adults. A huge number of convenience foods contain a number of preservatives and colorants that have an adverse effect on some individuals, especially the young.

So what's the answer? Some suggest you cut out a whole range of foods and drinks such as all dairy products, yellow foods, junk food, all food with colorants, fried foods, soda and fruit juices for 2 weeks. You will then need to slowly reintroduce each of them and monitor any behavioral differences, but I know if I did this, my little one would be packing her bags and moving in with the neighbors.

I suggest the first step is to keep a food and behavior diary with time lines for 2 weeks to allow you to monitor what is drunk and eaten along with any personality changes. If you see a link between certain foods or drinks with a change in behavior, check all the ingredients and see if there is a common theme, then avoid,

to a degree, foods containing those ingredients. It would be a bit harsh saying your child can't eat birthday cake because of all the colorants, but you can do as I do and just think ahead and be prepared for the fallout.

Although every one is different the most common causes of food intolerance are colorants such as sunset yellow (E110), carmoisine (E122), tartrazine (E102), allura red (E129) and also products such as soda's, energy drinks and even those 'healthy' fruit drinks that contain lots of sugar.

Although it's hard it is to limit their favorite foods, it helps if once you have discover what might be affecting them try a similar alternative to their favorite munchie, but without those problem additives. Whilst this maybe time consuming it can be done. You will then need to educate them to avoid the 'bad' foods. If you are a busy parent or just need some help to put you in the right direction it is worth contacting diet and nutrition specialists. They can help by analyzing the diet and then going on a super market run with you to work out the 'good options'.

Now as the first option in fighting behavioral problems many parents and individuals are looking at what is consumed rather than opting for drugs as the only solution.

## Meet Jennifer DOB 2001

Too many kids start out life without being loved or nurtured. It often takes a while for these kids to learn to trust, to learn to open up and to get out of survival mode.

Jennifer is a little girl in need of some one on one attention. Almost 7 years old, she loves to play in the dirt, ride her bike and catch frogs. She also enjoys watching cartoons, playing t-ball and taking baths. Jennifer is currently in kindergarten and she is working on learning how to write her name and read. She's always on the move and requires constant supervision. Jennifer is shy but she can also be very loving and affectionate. She craves individual attention and can be competitive with younger children for her caregiver's attention. Jennifer participates in therapy on a regular basis and is working on her social skills.

Jennifer needs to learn boundaries from a family with patience -- someone willing to let her develop and blossom in her own time.

For more information about becoming a foster or adoptive parent, please contact Tracy Eilers at [tracyeilers@adopttexas.org](mailto:tracyeilers@adopttexas.org).

## Advertise YOUR business to YOUR neighbors for less than 8¢ per home.
