Meet Treyvon

Every day across Texas, thousands of children like 11 year old Treyvon wonder where today will lead them. Having been removed from their families due to abuse and or neglect, these children are looking for stable, loving family relationships that will allow them to feel safe and secure. Often these children are moved from one foster home to another as they experience difficulty adjusting to new rules, roles and expectations they have never experienced before and are ill prepared to meet. They face a never ending stream of changes in care givers, schools, caseworkers and foster siblings that often results in a sense of hopelessness and a lack of investment in relationships because they have found that caring leads to loss.

Despite these challenges, these children can be resilient. They bring strengths to their situation that can help to overcome the obvious challenges they face. Take Treyvon, for example. He is anything but an average child! In fact, he is an extremely bright child, who excels in all subjects at school. His future is hopeful as he desires to become an architect, engineer or author. Treyvon is a well rounded child who enjoys outdoor activities like football, swimming and riding horses. Like most boys his age, he loves to eat, with his favorite foods being pepperoni pizza and spaghetti with meatballs.

Treyvon needs a structured family that will provide him the love, encouragement and discipline that he needs while understanding the challenges he faces in adapting to a world much different from his early life experiences. He has a great mind that needs stimulation and direction to help him accomplish his goals. Adopting a child like Treyvon from the foster care system is not difficult or expensive. Perhaps you and your family would be a good place for Treyvon to learn and grow.

Spring Landscaping & Gardening Tips

Here in Houston it's time to start planning for the soon to come spring garden activities. For those of you who need a little guidance on what your landscape needs will be and some helpful hints to properly prepare we have outlined some of the most commonly asked questions. The following suggestions can help yield the desired results for you and your neighbors.

Before the weather starts to warm up have a plan to keep your landscape properly watered, this is very important. Those of you that have an automatic irrigation system can take advantage of this time to check it and make sure all repairs have been made prior to the extreme conditions we will face in the summer. Remember to set your irrigation controller to water between the hours of 2:00am and 6:30am. For those of you that do not have the benefit of an automatic irrigation system you will need to come up with a way to water with hoses and portable sprinklers. We suggest trying to use more than one sprinkler at a time if possible, this will save you some time. Set a schedule that will allow you to water in the early evening, when the sun is starting to set. Even though the best time to water is early in the morning this watering time may fit better in your daily schedule while still allowing you to help prevent the loss of water due to evaporation. Also make sure your hoses are in good condition and have no leaks. Don't over water and make sure your sprinklers are adjusted; this will help conserve water. The most important thing to consider is to evaluate the needs of your landscape and water accordingly.

Another item that many people have questions about is the type of fertilizer they should use and when to apply it. In our opinion, the most beneficial formulation for a spring lawn fertilizer with a post emergent, to take care of broadleaf weeds, would be the Scott's 29-3-4 blend with Atrazine. Another formulation we would recommend that is a well balanced

lawn fertilizer without any post emergent would be a 15-5-10 blend. Both of these fertilizers will promote a healthy green lawn. There are also special formulated fertilizers for your hibiscus, azaleas, camellias, bougainvilleas and other plant material that have special needs. All or most of these fertilizers can be found at your local lawn and garden centers as well as the Home Depot. Fertilizer needs to be applied at the rate recommended on the label, using the recommended spreader. Please remember one thing, "more is not better", especially when comes to fertilizers blended to control weeds with herbicides. Fertilizers should be applied during the first two weeks in March. After the fertilizer is applied make sure to wash down or sweep off concrete walks and driveways, this will help prevent discoloration caused from iron.

If you have any perennial plant material, such as ornamental grasses, groundcover or other such plants, cut back these plants to a one inch stub after the last chance of freezing temperatures. Other plants that have been damaged from the cold weather may need to be trimmed instead of cut back. The trimming required for these plants may be minor; this will be up to you. Crepe myrtles will also need to be trimmed not cut back. When trimming your crepe myrtles remove any rubbing branches and deadwood then trim only the tips that are no larger than approximately 1/4 of an inch.

We recommend mulching all beds and tree wells, doing this protects your plant's root system as well as adds a rich clean look to your landscaped beds. Apply the mulch after you have completed all of your trimming and cutting back any of your perennials. Try not to apply more than two inches of mulch at one time. Spring is a great time to start enjoying your lawn and all of your hard work; however this is just the beginning of our growing season and all of the work it takes to have a beautifully landscaped yard. **Enjoy your spring garden work!**

Playgrounds

 **What's a Sprayground?**

More and more cities are opening spraygrounds, which are water playgrounds. At a sprayground, kids can shoot each other with water cannons and get sprayed by dozens of water jets that squirt from different colored nozzles and hoses.

Do you have a favorite playground? Maybe it's a new wooden one that has lots of tall towers and passageways. Or maybe your favorite is an old-fashioned playground with swings and a seesaw. Playgrounds are fun places for kids because there's so much to do and other kids to have fun with.

But sometimes kids get hurt at playgrounds. That's no fun, so here are 10 ways to keep safe:

1. Take a grown-up. As kids get bigger, they like doing things on their own. Going to the playground

shouldn't be one of them, though. Grown-ups come in handy because they might spot problems at the playground, they can help you down if you get in a tight spot, and they can help if you happen to get hurt.

2. Take a good look around. If the playground has lots of trash, such as broken glass, or the equipment looks broken, don't play there.

3. Keep your size in mind. Many playgrounds have some equipment that's for little kids (like 2- to 5-year-olds) and other equipment that's meant for older kids. Use the equipment that's right for your age. If you squeeze yourself onto a swing for toddlers, you might get stuck. Likewise, if your little brother or sister starts climbing something meant for older kids, guide him or her to the little kid stuff.

4. Don't go too high. Many playgrounds have tall stuff to play on, such as towers or open passageways between equipment. Don't climb higher than you feel comfortable, and feel free to ask your grown-up if you need help getting down. Never climb up the outside of equipment, or hoist yourself up on the roof. The view might be cool, but it's a long way down.

5. Look out below. The best playgrounds put down special surfacing material, such as mulch, wood chips, sand, gravel, or rubber matting. These surfaces can help soften a fall, but that doesn't mean you won't get hurt, especially if you tumble from a high spot.

6. Swing safely. Kids often get hurt at the playground because they get hit by someone on a swing. If you're swinging, watch out for people who might be getting too close. And if you're walking around the playground, don't get too close to the swingers.

7. Use your head. Sometimes you'll see kids going headfirst down the slide or maybe two or three kids will get on a piece of equipment that's only meant for one. Or some kids might start goofing around and trying to push each other off a swing or off of a high spot. If your grown-up sees you doing this, he or she will probably say, "Knock it off. Someone's going to get hurt." It's true, so try to use the playground equipment properly. And if you get stuck, or don't know how to get down from something, call your grown-up over so he or she can help you down.

8. Report problems. If you see graffiti (when people write or paint on stuff), a broken swing, or find any other problems while you're playing, tell your grown-up. He or she can report the problem so it can be fixed.

9. Clean up. If you bring a drink or snack to the playground, clean up your trash before you leave. When you do, the park will look nice when the next kid comes along to play and you will have shown that you're a good playground citizen.

10. Have a great time! How can you make a good time at the playground even better? Bring a friend and only complain a little when it's time to leave.

Skim Jam

Skim Jam is an annual Flatland Skimboarding competition hosted by Skim 2 Live in the spring of each year in Cypress, Texas. This year the competition will be on April 23rd from noon till 3 in the back of Ravensway Neighborhood (Jarvis Rd. & Timberlake Dr.). The unique thing about the competition and Skim 2 Live is that everything is done in efforts of FIGHTING BREAST CANCER. The past 3 years have shown enormous growth as the 2008 competition raised \$250 and this past year, in 2010, more than \$6,000 in funds were raised with a crowd of about 600 people throughout the day. This year is looking bigger than ever with expanding support. All profits benefit The Rose: a non-profit breast cancer organization based in Houston (www.the-rose.org). The group promotes living healthy, active lifestyles to prevent breast cancer. We are also a very environmentally conscious group with goals to keep Cypress Creek clean for the animals and for the skimboarders.

Prescription Drug Take-Back

On April 30, 2011 from 10am to 4pm DEA and its community partners will take part in a nationwide prescription drug take-back, operating collection sites around the nation where Americans can turn in their unused, unneeded, and/or expired prescription medications. Unused or expired prescription medications are a public safety issue, leading to accidental poisoning, overdose, and abuse. This service is free and anonymous. Tablets, capsules, and all other solid dosage forms will be collected. Intravenous solutions,

injectables, and syringes will not be accepted. To find a collection site near you, go to www.dea.gov and click on the National Prescription Drug Take-Back Day icon.

FACTS YOU NEED TO KNOW ABOUT DROWNING

Drowning is the leading cause of unintentional injury-related death in children ages 1-4

Drowning is the 2nd leading cause of unintentional injury-related death ages 1-14.

DROWNING WILL AFFECT YOU OR SOMEONE YOU KNOW

For more information, check out our website at

www.colinshope.org

DROWNING CAN STILL OCCUR EVEN IF YOU KNOW HOW TO SWIM

NO ONE is "drown proof" – no matter their level of swimming ability.

Falls, entrapments, and injuries lead to drowning regardless of swimming level.

A majority of people overestimate their own and their child's ability to swim, especially in a panic event.

DROWNING IS QUICK AND SILENT

Drowning occurs in as little as 2 minutes.

Irreversible brain damage occurs in as little as 4 minutes.

Most children are out of sight or missing for less than 5 minutes and usually in the presence of 1 or both parents.

Most children die who are submerged for as little as 6-10 minutes.

Children who drown do not **scream, splash, or struggle**. They silently slip beneath the water, even with adults & lifeguards present.
