*We realize you have a choice so we appreciate the opportunity to earn your business.
Building clients for life while giving back to the community in order to make a difference!*

In my 9 years of serving the Atascocita/Humble area real estate needs, I have sold over 70 million dollars in property. This encompasses more than 400 transactions representing Buyers and Sellers, resale and new homes and specializing in Eagle Springs, the neighborhood in which I live and have called home for the past 7 years. Thank you Eagle Springs for your continued trust and enthusiasm in my real estate business.

CONSTABLE'S CORNER

*What YOU Can Do to Help Prevent Yourself from
Becoming A Victim of Burglary of a Motor Vehicle*

TAKE – LOCK – HIDE

This information has been published before, but it bears repeating!

LOCK YOUR VEHICLE!

Yes, it takes seconds to break a window, but doing so makes noise – and criminals hate making noise.

TAKE YOUR VALUABLES!

Remove any valuables and take items with you, including faceplates for any after market stereos. If a criminal doesn't see anything, they're less likely to break in, and will go to the next vehicle to window shop.

HIDE YOUR VALUABLES!

Remember to hide your valuables BEFORE you park in the place you're leaving your vehicle. If a criminal sees you put a laptop in the trunk, they'll just break into the trunk when you leave. The same advice goes for putting property under a seat. If a criminal sees you reaching under a seat, they'll assume something is under there and break in, looking for property.

DON'T PARK IN SECLUDED AREAS!

Parking in well-lit parking lots, with good "sight lines," make it more likely your vehicle is visible to the general public. Attended parking lots, monitored by uniformed or easily identifiable legitimate parking attendants, are ideal. Remember, criminals don't like witnesses.

KEEP A RECORD!

Record serial numbers of property you may leave inside your vehicle. If stolen, it's more likely that a suspect will be identified and caught, if he tries to pawn the stolen property.

If you wish to report a Motor Vehicle Burglary, or any other incidents within the community contact the Harris County Pct. 4 Constables Office dispatch line at: 281-376-3472 you may remain anonymous if you wish

Will Homes continue to lose value in 2012...

...or are we FINALLY at the bottom of this endless real estate crash?

Money Magazine reports that many parts of the US will actually see home value APPRECIATION in 2012.

Houston Real Estate Milestones in December:

- Volume of single-family home sales rose for a seventh consecutive month;
- At \$160,000, the median sales price for single-family homes reached the highest level for a December in Houston;
- Single-family home rentals rose 12.3 percent;
- Townhouse/condominium rentals increased 0.7 percent;
- 5.8 months inventory of single-family homes is the lowest level since December 2009 and compares favorably to the national average of 7.0 months.

Feral Hogs Sighted in Eagle Springs

Contributed by Keith Crenshaw

Texas has the largest feral hog population in the country. Feral hogs or wild hogs are an exotic species of pig that was brought over during colonization and at various times throughout the history, were released to run wild. Over time they have developed to what we now call the Feral Hog.

Estimates for the population of free roaming feral hogs for the state of Texas range from 1 to 3 million in total numbers and have been considered a nuisance animal for farmers and ranchers for well over 200 hundred years. Feral hogs cause a huge economic impact on agricultural; and more recently, to urban properties. Over the last several years, the City of Sugarland and other communities around the Houston area have been dealing with the issue of property damage by feral hogs.

In urban areas, feral hogs are most often found along irrigated lawns, retention ponds, local wetlands, and golf courses. Feral hogs root up and destroy the soil surface for two reasons: 1) they are looking for food by eating bugs, grubs, earthworms, and rooted vegetation, (feral hogs are omnivores); and 2) are looking for places to cool off by covering themselves in mud.

It was brought to the attention of Texas Parks & Wildlife in January of 2012 that feral hogs had moved into the neighborhoods along the north side of Beltway 8 from the communities of Summerwood to Eagle Springs. There was a report of a property owner in Aspen Glen, who had experienced property damage between his property and the retention pond that lies just south of it. A trapping and removal protocol was begun by Crest Management to remove the Feral Hogs from the area.

Trapping and removal is the best management tool for urban landowners to reduce the damage caused by them. Feral hogs are difficult to control because they, 1) reproduce quickly, 2) can live just about anywhere, and 3) are highly mobile. Females can breed as young as 6 months of age and produce up to 5 litters in a two year period. Feral hogs gestate their young for 115 days and have litters with an average size of 6 piglets, but can range up to 12 piglets per female.

Feral hogs move in family groups and because female hogs are highly protective of their young, residents should follow the leash law for their pets. A pet on a leash is less likely to chase after hogs and in turn get hurt. Feral hogs are known to chomp their jaws as a warning sound to let you know they are in the area, but are more likely to run for cover when disturbed.

Because feral hogs are wild animals, residents should not approach them. If feral hogs are sighted in the neighborhood, you should contact Bill Higgins with Crest Management at (281) 945-4625 or you can contact Keith Crenshaw with Texas Parks & Wildlife at (281) 456-7029.

Texas Parks & Wildlife is the state agency in charge of the protection and management of wildlife species for the enjoyment of present and future generations. Keith Crenshaw is one of two Urban Biologists that help the residents of Harris County under the Wildlife Diversity Program for Texas Parks & Wildlife.

CUB SCOUTS Scouting for Food

On Saturday, February 4th, our Eagle Springs Cub Scout Pack 926 joined Scouts across the United States of America in the annual Scouting for Food campaign. With the support of Eagle Springs' residents, Pack 926 collected over 800 cans of food for the HAAM Food Pantry, which benefits local families in need.

We would like to thank all those who contributed their time, energy and canned goods to this project!

For more information on Cub Scout Pack 926, go to: www.pack926.net.

Being Green at Home – Part I

When it comes to the environment, being a good global citizen begins at home. From recycling to using alternative cleaning materials, small changes at home can add up to real benefits for our community and our planet, not to mention our health.

It may be a cliché, but the best way to be Earth-friendly is to cut down on what we consume and recycle whenever we can. The U.S. generates over 208 million tons of municipal solid waste a year, according to the National Institute of Health. That's more than 4 pounds per person per day! Every little bit helps. Did you know that recycling just one glass bottle saves enough electricity to light up a 100-watt bulb for four hours?

Below are some easy ways to green up at home.

WATCH THE TEMP

Almost half a home's energy consumption is due to heating and cooling.

We've all heard it before, turn down the thermostat in cold weather and keep it higher in warm weather. Each degree below 68°F (20°C) during colder weather saves 3%-5% more in heating energy, while

keeping your thermostat at 78°F in warmer weather will save you energy and money. A programmable thermostat will make these temperature changes for you automatically and are inexpensive and easy to install. Clean your air filter monthly during heavy usage.

To stay cool in warmer weather, shade your east and west windows and do heat-generating activities such as dishwashing and clothes drying in the early morning or late evening. Use ceiling fans instead of air conditioners when possible.

LIGHTS

Switching from traditional or incandescent light bulbs to Compact Fluorescent Lighting (CFLs) is an effective, simple change everyone can do. Making this change will help to use less electricity at home and prevent greenhouse gas emissions that lead to global climate change. Lighting accounts for close to 20 percent of the average home's electric bill. ENERGY STAR qualified CFLs use up to 75 percent less energy than incandescent light bulbs and last up to 10 times longer.

Being Green at Home- (Continued from Page 8)

If every home in America replaced just one incandescent light bulb with an ENERGY STAR qualified CFL, in one year it would save enough energy to light more than 3 million homes.

While CFLs are more energy efficient, they do contain a small amount of mercury, which means they should be handled with care and disposed of properly. They cannot go into the trash bin for pick up! They are accepted at household hazardous waste (HHW) facilities and many local hardware stores such as Lowe's and Home Depot accept them for proper disposal.

CLEAN GREEN

Stop buying household cleaners that are potentially toxic to both you and the environment. Learn to read labels for specific, eco-friendly ingredients that also perform effectively. These include grain alcohol instead of toxic butyl cellosolve, commonly found in carpet cleaner and some window cleaners as a solvent; coconut or other plant oils rather than petroleum in detergents; and plant-oil disinfectants such as eucalyptus, rosemary or sage rather than triclosan, an antifungal agent found in soaps and deodorant.

If you're really ambitious you may want to try making your own cleaning products. Use simple ingredients such as plain soap, water, baking soda, vinegar, washing soda (sodium carbonate), lemon juice and borax and save money at the same time. Recipes are easy to find online or you can find many books with information on making your own cleaning supplies at your local library. Two good ones to try are: "Clean and Green" and "Better Basics for the Home."

REDUCE PLASTICS

Every year, Americans throw away over 100 billion polyethylene plastic bags. Everything from grocery and trash bags to plastic sandwich bags. Many people don't realize that plastics are made from petroleum; the processing and burning of which is considered one of the main contributors to global warming, according to the EPA. In addition, sending plastics to the landfill also increases greenhouse gases. Reduce, re-use and recycle your plastics for one of the best ways to help our environment.

USE LESS PAPER

Did you know you can buy "tree-free" 100% post-consumer recycled paper for everything from greeting cards to toilet paper? Paper with a high post-consumer waste content uses less virgin pulp and keeps more waste paper out of landfills.

Remove yourself from junk mail lists. About 44% of all junk mail is thrown in the trash, unopened and unread, and ends up in a landfill. Contact the Direct Marketing Association's Mail Preference Service at P.O. Box 643, Carmel, NY 10512, to reduce the amount of junk mail you receive. Or go to their website and fill out the online form at: www.dmaconsumers.org/cgi/offmailinglist

And finally... Carry your own reusable cloth bags to the store to avoid using paper or plastic store bags.

Watch for Part 2 of Being Green at Home in the April issue of The Talon. Let's all do our part to Keep Eagle Springs Green!

Sus necesidades son mi enfoque principal.

Welcome to our New Landscape & Gardening Series!

Our local "Garden Guy" and fellow Eagle Springs' resident will be contributing tips and information to help us with our gardening & landscaping needs!

Do you have a landscape or gardening question? Ask the Garden Guy!

Cold season broadleaf weeds are a major problem throughout our area where mild temperatures stimulate luxuriant growth during winter and spring. These weeds including dandelion, chickweed, henbit, burweed and clover are particularly troublesome in early spring when warm season turf grasses are dormant. Not only are these weeds unsightly, but they increase mowing requirements and delay the recovery of desirable grasses. Likewise, warm season broadleaf weeds including woodsorrel, spurge and buttonweed are troublesome during summer months. Controlling broadleaf weeds helps turf grasses develop a dense, uniform cover that resists further weed invasion, reduces mowing requirements and improves the appearance of a property.

Regular mowing and proper fertilization during late winter and spring improves the appearance of turf areas and reduces the competition weeds provide, but does not eliminate them from the turf. Chemical control with nonselective herbicides in dormant Bermuda grass or with selective herbicides, will remove weeds from the turf grass. When selecting an herbicide, accurate

identification of weeds is the first step to successful weed control. With the majority of our lawns today being St. Augustine, maintaining a lush, thick grass is really easy. It's easy to maintain a beautiful lawn yourself if you have the time and the right tools.

The first thing, Tools! Make sure the blades on your lawn mower are always sharp, dull blades will tear the grass rather than giving it a clean cut. This will encourage diseases and other problems in the turf. Mow your lawn on a schedule, it is never a good idea to let the grass grow up high and cut it short. When the blades get longer the root system stops producing new runners and that causes your lawn to not have the thick lush look we want.

Second thing, Watering! If you are still the one on the block dragging a water hose around the yard, make sure you don't fall asleep or forget about it. Under watering and over watering will have a dramatic effect on your weed control as well as play a big part in the performance of your lawn. If you have a sprinkler system, use the optional program settings so that you can water the lawn areas less often but for a longer period and water the bedding areas more often for a shorter period of time.

Third and last thing, Feeding! There are many types of fertilizers. Remember to never apply fertilizer or any other chemical without proper safety equipment. Feeding you lawn will give it additional supplements needed to fend off weeds, insects and to promote a longer lasting turf. You can be effective in the war on weeds with only 4-5 feedings a year.

Think about it like this, grass is a living thing just like us. We need a regular hair cut, proper hydration and vitamins to live a stronger, healthier, more productive life. We can live without some of these things, but just like the grass not as long and not without problems. If you have questions regarding seasonal weeds or any other landscape questions, please email: EagleSpringsGardenGuy@yahoo.com.

EAGLE SPRINGS

FROM EAGLE SPRINGS POOL COMMITTEE

Important News About Pool Cards and Processing Times 2012

YOU ASKED. WE LISTENED.

After careful consideration and much deliberation, the Pool Committee and Eagle Springs Board have decided to continue to use the Photo ID cards in conjunction with the Electronic Access Device. Since Pool Card Processing in such a large community takes a lot of time and volunteers, we have voted to extend the life of the Pool Cards. The Pool Id Cards and stickers will be extended to cover 2 years instead of one.

- Anyone with a current 2011 pool card will be valid for the 2012 swim season.
- Any new resident will receive their pool card from the community representative and the new card will be valid for the 2012-2013 swim seasons.
- Any resident who needs a replacement card or new card for a family member will receive their pool card from the community

representative and the new card will be valid for the 2012-2013 swim seasons.

In an effort to disburse the number of residents needing to get Pool Cards this year, the Pool Committee will hold two volunteer sessions for Pool Card processing.

CLUBHOUSE DATES & TIMES:

Saturday	April 28th	9:00 a.m.- 1:00 p.m.
Tuesday	May 17	6:30 – 8:30 p.m.

Should you be unable to attend any of the above dates and times, you may obtain your Pool Card from the onsite Community Representative during their scheduled hours.

COST:

New Pool Cards	\$2.00/each
Guest Cards	\$4.00/each
ES Lanyards	\$2.00/each

IF YOU ARE NEW TO THE COMMUNITY OR NEED A REPLACEMENT CARD:

- Come to the clubhouse at the onsite hours or one of the Pool Committee Volunteer days.
- Bring everyone in the household that will need Pool Cards since your pictures will be taken at that time.
- Fill Out an application for Pool Cards.
- If you are new to the community, bring closing documents or rental agreement.
- Verify your ID, residency, and eligibility.
- For new pool cards (and those turning 13): you will have your photo(s) taken and pick up new pool cards.
- Proof of Residency: If your Driver's License has an Eagle Springs address that is sufficient proof; if not please bring a current

Did you know that Eagle Springs has several Neighborhood Groups?

There's always something fun going on in our neck of the woods...

Eagle Springs Stroller Stride

The Eagle Springs Stroller Stride group was created for stay at home Moms and Dads who are looking for a way to lose their baby weight (even Dads gain some baby weight!) and get to know other Moms and Dads in the neighborhood.

It's a free group, open to all residents of Eagle Springs who would like to participate. All you need to do is show up and start walking!

We are currently meeting three times a week on Mondays, Wednesdays and Fridays at 9:45am. We meet at the Sports Complex, off of Eagle Springs Parkway & Valley Lodge Parkway, and usually walk until about 10:30am.

Although our current schedule only has us meeting to walk three times a week, we are open to adding addition walking days/times for those interested. We also plan on including more activities other than walking very soon.

Please contact Sara Veillon for more information about this group! Sara Veillon: scveillon@gmail.com

We look forward to walking with you!

To see all the other groups, log on to: www.INSIDEEAGLESprings.com and click on the Groups tab at the top of the homepage!

Don't see a group and thinking of starting one?

The Eagle Springs Clubhouse

Looking for a place to hold a birthday party, baby shower or other special event or get-together?

Look no further!

Did you know that one of the amenities available exclusively to Eagle Springs' Residents is the private use of our Clubhouse & Pavilion?

Residents may rent the facility for their private use on a first come/first serve basis. The modest rental fee includes the use of all tables & chairs, restroom and kitchen facilities.

More information about the Eagle Springs Clubhouse is located on our Community Intranet: www.INSIDEEAGLESprings.com, under the Clubhouse Reservations tab. You will find the Online Reservation Forms located there as well.

You may check availability from the Community Events Calendar on the homepage, fill out the reservations form and submit online ~ all from the comforts of home!

Stay tuned in to our community website for updates and information about our newest amenities, including the new Valley Springs Clubhouse coming in 2012!

The goal is to fill in the grid so that every row, every column, and every 3x3 box contains the digits 1 through 9. Each digit may appear only once in each row, each column, and each 3x3 box.

UNIQUE ALZHEIMER'S CARE

AUTUMNGROVE Cottage

HOMELIKE ENVIRONMENT -

Our homelike environment is one of the cornerstones in the AutumnGrove Cottage belief that people should be able to age in the same manner they are accustomed to living.

PERSONALIZED CARE -

AutumnGrove Cottage caregivers are involved in all aspects of our residents care through out their day from grooming, bathing, doing activities with them to preparing and assisting them with meals. This allows our caregivers to get to know the residents preferences and to provide more personalized care for our residents.

DEEP RELATIONSHIPS -

Since an AutumnGrove Cottage only cares for 16 residents, staff and residents get to know each other in a very personal and intimate way. With the common bond of being impacted by Alzheimer's, family members become friends and often become an informal support group for one another.

Come take a Virtual Tour on our website:
www.AutumnGrove.com

"Our purpose is to honor our residents and those who love and care for them."

Electronics Recycling Event!

As you may know, in our efforts to be a greener community, Eagle Springs hosted its first ever E-Recycling Event this past January!

WOW! What a great turnout we had!

CompuCycle, the company who recycled our retired electronics, praised Eagle Springs for hosting one of the best first time collection events they've participated in. The credit really goes to our proactive, green-minded residents! Thank you Eagle Springs!
