We even find the time to meet once a month for a mom's night out for a great time to unwind. Or are you interested in helping within the community with service projects? We have that! (And a whole lot more!)

Summer is here and the kids are out of school! The MOMS Club has lots of great activities planned! Come join other Moms and kids in many great outdoor and indoor activities. Do you have young children and looking for some fun things to do? Are you new to the area or a new mom and need a friend or support; we are here for you! A Focus on Physical Activity

PATHWAY TO IMPROVED HEALTH

By Concentra Urgent Care

Being physically active is one of the most important steps you can take to maintain or improve your health. When combined with eating a healthy diet, regular exercise can substantially reduce your risk of chronic disease, prevent weight gain, and improve your overall level of physical and emotional fitness.

HOW MUCH PHYSICAL ACTIVITY DO I NEED?

The U.S. Department of Health & Human Services (HHS) has recently published several recommendations related to exercise:

Any physical activity is better than no physical activity

Includes people with disabilities & Far outweighs the possibility of risk of injury or illness.

Most health benefits occur with at least 150 minutes a week

Both aerobic (endurance) and muscle-strengthening (resistance) are beneficial

For most people, additional benefits occur when

You increase the intensity of your physical activity, the frequency of your physical activity, & the duration of your physical activity

For more information on total fitness programs in general, you can contact your health care provider, your Concentra health specialist, or visit the National Safety Council's Web site at: <http://www.nsc.org/resources/Factsheets/hl/fitness.aspx>.

SHOULD OLDER ADULTS EXERCISE, TOO?

The same HHS guidelines apply, but older adults need to make sure that their fitness level and any chronic conditions allow them to safely perform physical activity. For example, if an older adult is at risk of falling, he should do exercises that maintain or improve his balance.

WHAT IF I HAVE A CHRONIC MEDICAL CONDITION?

If you have a chronic medical condition, you should be under the care of a health care provider. It is important to consult your physician about the type and amount of physical activity appropriate for you.

HOW DO I GET STARTED?

The health benefits of physical activity far outweigh the risks and some activity is better than none. Persons who have not been diagnosed with a chronic condition (such as diabetes, heart disease, or osteoarthritis) and do not have symptoms (e.g., chest pain or pressure, dizziness, or joint pain) do not need to consult with a health care provider prior to starting an exercise program.

LOOKING FOR VOLUNTEERS!

Center for Cultural Interchange is looking for volunteer hosts for foreign students. These students need a caring and safe environment to stay for the school year. Our students come from over 60 countries and are high school aged. They have their own spending money and are fully insured. Hosts are required to provide a bed and meals in their home. Searching for volunteers for the fall school year now. For more information or to get started please contact Jennifer Tausworthe at 713-203-6556 jennifer4cci@aol.com

TOP TEN TIPS for Improving Bad Breath

Suffering from bad breath, but not sure why? Think about drinking more water and using less mouthwash. Find out why and learn more ways to improve your breath with these top ten tips.

Call it by its fancy name, “halitosis,” and it won’t smell any sweeter. Bad breath is frequently a sign that you’re not keeping up with your oral health. The source of this unpleasant odor is, in most cases, bacteria living on your teeth, gums or tongue. Follow these ten tips for a breath of fresh air:

Brush your choppers twice each day. Better yet, brush after every meal. If you eat lunch at work or school, keep an extra toothbrush there. Also, be sure to replace your toothbrush regularly. Every few months, swap your brush for a fresh one.

Reach between your teeth. Flossing daily helps you remove food particles from between your teeth, where your toothbrush just can’t reach. Flossing also helps keep your gums healthy, preventing periodontal disease, which can also lead to bad breath. If using regular floss is difficult for you, try one of the many interdental cleaners available at drugstores.

Pick up an electric toothbrush. Along with floss, an electric toothbrush removes plaque better than a manual toothbrush.

Treat your tongue right. Bacteria can gather on the surface of your tongue, so use a soft-bristled toothbrush or a tongue scraper to clean it every time you brush.

Tap your inner teenager and chew gum. The act of chewing (sugarless!) gum stimulates the production of saliva, which naturally washes away bacteria and food particles. If you suffer from a lack of saliva due to “dry mouth,” a condition sometimes caused by medication, let us know; we can help address the problem.

Don’t fall for the myth of mouthwash. Most mouthwashes merely mask the smell of bad breath and don’t do anything to solve the underlying problem.

Hydrate, hydrate, hydrate. Drink water regularly to keep your mouth moist, and go easy on alcohol and caffeine, both of which are dehydrating.

Turn off the tobacco. Smoking and chewing tobacco lead to bad breath. They also increase your risk of a host of serious health problems, from periodontal disease to cancer.

Take note of what you take in. Certain diets, foods and medications can affect your breath. If your problem doesn’t appear to be oral, make a list of the foods you eat and medications you take. Review it with your dentist or your family doctor to assess the source of the problem.

Call in the experts. It’s important to have your teeth professionally checked and cleaned twice a year. Your dentist can give your teeth a thorough cleaning that isn’t possible at home, as well as check for and treat early signs of problems such as cavities or periodontal disease.

In rare cases, persistent bad breath can be a sign of a larger health problem. The American Dental Association lists possible medical sources of bad breath, including respiratory infection, chronic sinusitis, postnasal drip, chronic bronchitis, diabetes, gastrointestinal disturbance, and liver or kidney ailments. If your dentist suspects that your breath problem stems from a medical issue, he or she will recommend speaking with your family doctor immediately.
