

LONG CANYON Gazette

May 2013

Volume 6, Issue 5

A Newsletter for the Residents of the Long Canyon

Drowning Is Preventable

The Texas weather is warming up. Summer is almost here. Pools will soon open and the cool water will be calling your name. You can almost hear your kids laughing and the playing in the pool. Your family deserves to have many Best Day Ever moments in the water this summer. Please do not let those moments be ruined by the sound of a life guard whistle blast or the need to do CPR in order to save your child's life. Most families love a trip to the swimming pool, the lake or the beach during the summer...but the water can be deadly for a child.

Did you know that drowning is a leading cause of accidental death for children between the ages of 1 and 14, with kids under the age of 5 at even higher risk?

Colin Holst's parents did not know either. Sadly, June 13th marks the 5 year anniversary of his drowning in a public, lifeguarded pool in Austin. Since Colin's drowning in 2008, Central Texas-based Colin's Hope has become a nonprofit leader in water safety and drowning prevention.

My name is Alissa Magrum and I am the Executive Director of Colin's Hope. But I am also a parent to 8 year old Ella. So, from one parent to another, please listen to this message. It is simple but filled with purpose: DROWNING IS PREVENTABLE. YOU can help protect your children. Following a series of simple water safety tips creates multiple layers of protection. These layers WILL keep children safer in and around the water and CAN prevent drownings.

THE FIRST 3 OF THESE TIPS ARE KEY.

Practice constant visual supervision. Always assign an adult "water guardian" whose ONLY responsibility is to watch children who are in, near and around the water. If that water guardian needs to take a break, they must transfer their "watching" duty to another adult.

Learn to swim. Enroll children (and adults too) in formal swim classes. For kids under the age of 4, taking formal swim lessons reduces the risk of drowning by 88%.

Wear life jackets. Children who cannot swim should ALWAYS wear a U.S. Coast Guard-approved life jacket when in and around the water.

You can see additional tips, as well as more information on water safety and drowning prevention, on our website at www.colinshope.org.

Each year, Colin's Hope volunteers stuff and distribute 75,000 water safety packets to families in zip codes that have been targeted due to the high number of near drownings and drownings in recent years. This life saving information along with a Peel Inc. ad campaign, a Reagan National Advertising billboard campaign and a presence at many community events is helping to raise water safety awareness to prevent children from drowning.

WE ALSO NEED YOUR HELP. PLEASE SHARE THIS INFORMATION with family, friends, neighbors, teachers, babysitters...everyone! We have seen the difference that being aware and being prepared can make. Communities that have received our water safety information in prior years have seen child drownings and near drownings in their areas reduced to zero!

Please visit www.colinshope.org to find out how you can get involved in your own community. Find us on Facebook, follow us on Twitter, subscribe to our monthly newsletter or even support our efforts with a donation.

We envision a world where children do not drown. Please share that vision and together we will get there.

*Wishing you the SAFEST AND BEST SUMMER EVER,
Alissa Magrum Executive Director, Colin's Hope*

CONTROL YOUR WEIGHT, MINIMIZE CANCER RISK

Controlling weight can help a person reduce the risk of cancer, said an oncologist from the NCI-designated Dan L. Duncan Cancer Center at Baylor College of Medicine.

"We do not know exactly how and why obesity affects cancer risk, but we know there is an increase, so it is important for everyone to control their weight to minimize this risk," said Dr. Kent Osborne, director of the Duncan Cancer Center and the Lester and Sue Smith Breast Center, both at BCM.

Research has linked obesity to a greater risk of developing esophageal, pancreatic, colorectal, breast, endometrial, kidney, thyroid and gallbladder cancer, Osborne said.

In some cancers like breast cancer, there is also an increase in the risk of recurrence if a patient already has the cancer and is obese.

Many other factors, such as genetics, may play a role in cancer development, but keeping a normal weight is one thing people can change and it may help, he said.

Vandergrift High School Band Garage Sale

Submitted by Rich Keith

*May 4th 8am to Noon
River Place Elementary School
6500 Sitio Del Rio Boulevard Austin, TX 78730*

HIGH SCHOOL BAND GARAGE SALE: WE'LL PICK IT UP!

The Vandergrift High School Band program invites the entire community to participate in their garage sale. We want your gently-used items and we will pick them up for you. All monies raised from the sale of items benefit the band students.

Please contact us at vhsbandgaragesale@gmail.com to get location of drop-off sites or to request pick up of larger items. Please include name, address for item being donated, subdivision or apartment complex, cell phone, and item descriptions.

Boutique / higher-end items will be priced accordingly and sold from our "Boutique" area.

Vandergrift High School Band Silent Auction

Submitted by Rich Keith

ITEMS OR SERVICES WANTED FOR SILENT AUCTION BENEFITING HIGH SCHOOL BAND

Do you have a service or some item of value which you can donate to the The Vandergrift High School Band program? Or a gift card? The band will enter your item in their upcoming silent auction on Thurs. May 16. This is your chance to give back to the community and if you have a business you'll get free advertising while you're at it. All proceeds go toward the benefit of the band students.

We love unique and special items too! Please contact us to discuss your donations, questions, and ideas at secretary@vhsband.com.

TENNIS TIPS

By USPTA/PTR Master Professional
Fernando Velasco

How to Execute The Overhead “Smash”

In previous newsletters, I offered tips on how to hit a forehand groundstroke, a two-handed backhand, one-handed backhand, forehand volley, the two handed backhand volley, the serve, the forehand half-volley and the one-handed backhand volley. In this issue, I will offer you instructions on how to execute the overhead “smash” when players get a high ball and they hit the ball above their head. In the illustrations, Matilda O’Connor, player at the Grey Rock Tennis Club, shows the proper technique to execute this stroke. Photos by Charlie Palafox.

Step 1: The Back Step: When Matilda realizes that a ball is high enough to hit the overhead, she takes a step back on the side to hit the ball. The upper body turns, the racket starts the back motion by keeping the elbow in 90 degree angle and the left hand is pointing to the ball. Notice that her head is looking at the ball and keeping the chin up.

Step 2: The Point of Contact: When Matilda is ready to hit

the ball, her racket starts accelerating from the back position. She is making perfect contact on the upper part of the racket and the right wrist is “snapping” to get on top of the ball. Her left arm is still pointing to the ball to assure a good hit on the “sweet spot”. Her weight has shifted from the back foot to the front foot.

Step 3: The Follow Through: After the ball has been struck by the racket, Matilda will continue the swing of the racket across the left side of her body. The eyes are now focused on the path of her stroke. The left arm is on her left side. Her right foot still kept her toes on the court to allow for maximum balance on the stroke.

Step 4: The Ready Position: Even though the overhead “smash” is a powerful weapon, many times the opponents will return it back to the players. Here Matilda is ready for the next ball coming back to her. By the looks of her smile, it seems that her overhead was successful and she has won the point.

Look for in the next Newsletter: The Forehand Service Return

Brandy Finnessey

RESEARCHED

REVIEWED

RECOGNIZED

TEXAS MONTHLY
5-Star Award Winner
FOR THE 2ND YEAR IN A ROW!

"Brandy was awesome to work with. I'm a guy that doesn't know a lot about buying or selling houses, so I really needed someone to walk me through the process. I also needed someone I felt like I could trust. Brandy was all of that. She helped me find, negotiate, and buy a great house. She also helped me sell my previous house. If you're not an expert in real estate (and I'm not), then Brandy is wonderful to have on your side. I couldn't recommend her any more highly."

-- Bobby Bones, National Radio Host based in Austin Texas

"Brandy Finnessey of RE/MAX sold our home before it was listed in MLS, full price offer, cash! Great job, full time hustle."

You're very excited — your mom and dad promised to take you on a fun camping trip this year. Or maybe your scout group is gearing up for an awesome canoe trip. Enjoying the beauty and nature of the woods is fun — if you are careful. Here are some tips to keep you safe.

PACKING BASICS

Before you leave, pack these few important things to make your trip more comfortable and safe:

- map of the area
- compass or GPS (learn how to use it beforehand)
- cell phone (though you can't be sure it will work in remote areas)
- whistle
- bottled water and food
- sleeping bag
- flashlight with extra batteries
- sunscreen and sunglasses
- waterproof matches (for an adult to bring)
- first-aid kit with gauze pads, adhesive bandages, tape, tweezers, and antiseptic
- waterproof tent (set it up beforehand to practice)
- warm clothing, clean socks, and rain gear

INTO THE WOODS

Staying safe in the woods means using common sense. That means being aware of your surroundings and always camping with an adult. Never go into the woods by yourself. Some things you need to be careful of while you're camping are insects, poison ivy, extreme hot or cold temperatures, rain or snow, and areas where you could trip or fall.

BUGS

If insects bug you, ask an adult to set up camp away from the water and build a small fire. The water attracts bugs, and the smoke from the fire will keep most of the bugs away. Another thing you can do is to remember to keep the tent door zipped at all times, even if you're just going in or out for a minute. Also, turn off your flashlight

before you enter your tent because insects such as moths are attracted to the light and will follow you.

Always check for ticks at the end of the day when you've been in the woods. Ticks can carry disease and germs. Some ticks are tiny, like the size of the head of a pin! You'll want an adult to help you inspect your body for ticks. Check behind your knees and ears, under your arms, and in your groin — that's where your legs meet your abdomen, or belly area. If you're camping with a pet, have an adult check your pet for ticks, too — dogs and cats can pick up ticks in their fur even more easily than humans. If you do find a tick, it needs to be removed. Get an adult to help you.

POISON IVY

Poison ivy is a plant that can cause an itchy skin rash in some people. Its leaves grow in groups of three, but the plant can still be hard to spot. If you accidentally touch poison ivy, wash the area with soap and water as soon as possible. The oil from the poison ivy plant can spread on clothes or even your dog. To try to prevent a poison ivy rash, there are products you can apply to your skin before going into the woods. Stores that sell outdoor equipment and sporting goods may carry them.

STAYING SAFE OUTDOORS

Your Campsite

Roasting marshmallows and singing songs by an open fire are favorite camping activities. Adults, not kids, should start campfires. Adults also need to watch the fires and make sure they are out when you're done. Never leave a fire without anyone to watch it. Don't forget to put out your fire by dumping water or shoveling dirt on it when you sleep or leave your campsite. Feel the ground around the area where the fire was to make sure it isn't warm.

Your Food and Water

When you're exploring outdoors, eat or drink something only if an adult says it is

safe. Even if streams or lakes look crystal clear, they could contain germs and the water may not be safe to drink. Bring bottled water to drink. Likewise, never eat wild berries. Some are poisonous and it may be tough to know which are safe. Good snacks for the outdoors include fruit, trail mix, crackers, granola bars, bread, and peanut butter.

Your Clothing

Wearing layers is a good idea when you're outdoors. That way, you can take off a layer or two if you get too warm. Wear comfortable boots when hiking so your ankles are supported and you don't get blisters. Keep your arms and legs covered while hiking to avoid ticks and insect bites and wear knee-high boots and long pants when you are in an area with snakes. Make sure to take rain gear, such as ponchos and waterproof jackets, to keep you dry if an unexpected shower occurs.

Watch Out for Wildlife

Although animals are cute to look at, wild animals are best enjoyed from far away. Don't go near or try to feed a strange animal. It's better to enjoy these animals at the zoo, in books, or on the Internet. To keep animals such as bears or wolves away from your campsite, keep it clean. Food and anything else an animal might smell must be packed away. In fact some campers put all their food, even candy bars, in a bag (called a "Bear Bag") and hang it from a tree branch away from the campsite. If they can smell it, the animals will be led away from where the campers are.

What if You Get Lost?

Stick with your group when you're in the woods. Carry a whistle and blow it if you get separated from the group. If you have a cell phone and it's working, use it to make contact with your group. If you do get lost, wait in a safe, sheltered place for an adult to find you. The sooner you're found, the sooner you can go back to having fun in the great outdoors!
