PROTECT EYES THIS SUMMER

Take precautionary measures to protect your eyes during the summer to prevent long-term damage to eyesight, said a Baylor College of Medicine ophthalmologist.

"Ultraviolet light, or UV exposure, has been linked to the development of macular degeneration, cataracts and other vision-loss problems," said Dr. Elizabeth Baze, assistant professor of ophthalmology at BCM.

Baze offered tips you can practice to help protect your eyes from sun damage this summer.

- The more the sunglasses wrap around and shield your eyes and the skin around the eyes, the more protection you have.
- Sunglasses need to provide 99 to 100 percent UV protection.
- Sunblock is a must, including the skin around the eyes.
- A broad-brimmed hat can add extra protection.

If you have an existing eye condition like macular degeneration or cataracts, protecting your eyes from the sun should be a top priority during the summer, she said.

ADVERTISING INFO

Please support the advertisers that make the West Lake Hills Echo possible. If you are interested in advertising, please contact our sales office at 512-263-9181 or advertising@peelinc.com. The advertising deadline is the 8th of the month prior to the issue.

ARTICLE INFO

The West Lake Hills Echo is mailed monthly to all West Lake Hills residents. Residents, community groups, churches, etc. are welcome to include information about their organizations in the newsletter. Personal news for the Stork Report, Teenage Job Seekers, recipes, special celebrations, and birthday announcements are also welcome.

To submit an article for the West Lake Hills Echo please email it to westlakehills@peelinc.com. The deadline is the 15th of the month prior to the issue.

COVER PHOTO

Do you take great photos?

Do you take great photos? Would you like to see your photo published? We are looking for great cover photos for upcoming issues of the West Lake Hills Echo. Our deadline for submittals is always the 9th of the month prior to the issue. All photos should be submitted electronically by the deadline date in high resolution (300 dpi) to westlakehills@peelinc.com. Portrait (vertical) photos work best.

To view other photos submitted please visit www.PEELinc.com/WestLakeHills.

By submitting your photo you agree to allow your photo to be published in future issues of the West Lake Hills Echo or other Peel, Inc. publications.

Cool & Refreshing Melons at Barton Creek Farmers Market this July

Melons are a wonderful natural way to stay cool and nourished during summer months. You'll find a wide variety of melons this summer at Barton Creek Farmers Markets on Saturdays from 9 AM, @ 1 PM at Barton Creek Mall and Sundays from 10 AM, @ 2 PM at Highland Mall.

We will be doing a fresh melon mania tasting on Saturday, July 20th at Barton Creek Mall. You can also bring the kids to enjoy holding their favorite pets at the Tiny Tails Petting Zoo.

Summer brings delicious veggies to the market too. You'll find sweet garden tomatoes, basil and other fresh herbs and summer squashes. Have you tried Armenian cucumbers? They are sweet and so easy to use in salads. The outer skin is very soft eliminating the need to peel the cucumbers so it shortens the salad prep time.

Two pizzas have become favorites at my house, caramelized onion pizza and pesto pizza? Both use fresh ingredients from the local markets and are easy to prepare. With the caramelized onion pizza start out by slicing two large onions and sautéing them in butter and olive oil for approximately 30 to 40 minutes on low heat to bring out the natural sugars. Place the onions on the pizza and top with fresh chopped mushrooms and a pinch of fennel seed or fresh cut fennel. Then cover all with grated mozzarella cheese and bake at 425 degrees until the crust is slightly brown and the cheese has melted. Serve with a glass of wine and salad. Mmm, mmm! It is easy to prepare and tastes wonderful.

Pesto pizza is equally delicious and easy to prepare. Use pesto as a base on your pizza and top with mushrooms, onions, olives and whatever else tickles your fancy. Top with grated mozzarella cheese and cook in the oven until the crust is lightly browned and the cheese has melted.

For backyard barbecues you might want to try High Country Bison or Texas Longhorn for a change. Both are pasture raised and grass fed and available at Barton Creek Farmers Market. We hope you'll stop in to find lots of other ideas for using local organic foods at Barton Creek Farmers Markets.

TENNIS TIPS

By USPTA/PTR Master Professional
Fernando Velasco

How To Execute The Backhand Service Return

In previous newsletters, I offered tips on how to hit a forehand groundstroke, a two-handed backhand, one-handed backhand, forehand volley, the two handed backhand volley, the serve, the forehand half-volley, the one-handed backhand volley, the overhead “smash” and the forehand service return.

In this issue, I will offer you instructions on how to execute the second most important shot in the game of tennis: The Service Return, since it is the response to the first most important shot of the game: The Serve. In the illustrations, Julie Comey, player at the Grey Rock Tennis Club, shows the proper technique to execute this stroke. Photos by Charlie Palafox.

Step 1: The Ready Position: When Julie is getting ready to return the serve, her eyes are focused on the tennis ball held by the opponent. Knees are relaxed and the hands are holding the racket with a relaxed grip.

Step 2: The Split Step: When the opponent tosses the ball into the air, Julie will take a hop with both feet off the ground, trying to time the split step with the contact of the ball on the

opponent’s racket.

Step 3: The Back Swing: Once Julie realizes that the ball has been directed to her forehand, she will turn her upper body and will take the racket back. Notice that the left hand is up in front to allow her to keep her center of gravity in the center. She has loaded her weight on her left foot and will be ready to step forward to meet the ball.

Step 4: The Point of Contact: Julie now is ready to step into the ball. She has kept her eye on the ball and her center of gravity now is shifted to the point of contact. Notice the right knee being slightly bent and the right foot is pointing to the ball meeting the racket.

Step 5: The Follow Through: Once Julie has finished her stroke, the momentum of the racket continues to move almost to a point behind her neck. Her left hand is next to her body and her left elbow is pointing toward her target. Her body is now ready to take the “split step” with both feet in order to prepare for the opponent’s returned shot.

Look in the next Newsletter for: The Forehand High Volley Approach Shot

Physical Symptoms Could Be Sign Of Depression

Depression and chronic mood disorders can manifest themselves through physical symptoms, said an expert at Baylor College of Medicine.

"Physical symptoms often drive a patient to see a primary care physician, and then the diagnosis of depression may emerge," said Dr. Sanjay Mathew, associate professor in the Menninger Department of Psychiatry and Behavioral Sciences at BCM.

Symptoms include gastrointestinal syndromes or chronic pain conditions. Many patients will have diagnoses of both a physical illness as well as depression.

The first step is to get a complete medical history and physical exam to rule out any medical conditions before making a psychiatric diagnosis.

Certain types of antidepressants and medications that help treat seizures also help with the physical symptoms of depression at low doses. This can help avoid the use of multiple medications.

A FOCUS ON HEAT EMERGENCIES

Healthy Tips To Stay Cool In Extremely Hot Weather

By: Concentra Urgent Care

Heat emergencies fall into three categories of increasing severity:

Heat Cramps, Heat Exhaustion, and Heatstroke.

Heat illnesses are easily preventable by taking precautions in hot weather. Children, elderly, and obese people have a higher risk of developing heat illness. People taking certain medications or drinking alcohol also have a higher risk. However, even a top athlete in superb condition can succumb to heat illness if he or she ignores the warning signs. If the problem isn't addressed, heat cramps (caused by loss of salt from heavy sweating) can lead to heat exhaustion (caused by dehydration), which can progress to heatstroke. Heatstroke, the most serious of the three, can cause shock, brain damage, organ failure, and even death.

SIGNS AND SYMPTOMS:

Heat Cramps

- Sweating
- Pain in arms, legs, and abdomen
- Heat Exhaustion
- Moist, pale skin
- Fatigue and fainting
- Dizziness and lightheadedness
- Headache and confusion
- Nausea and vomiting
- Rapid pulse and breathing

Heat Stroke

- No sweating
- Dry, hot, red skin
- Confusion/loss of consciousness
- Rapid pulse
- Temperature over 103° F
- Seizures

CAUSES:

The following are common causes of heat emergencies:

- High temperatures or humidity
- Dehydration
- Prolonged or excessive exercise
- Excess clothing
- Alcohol use
- Medications, such as diuretics, neuroleptics, phenothiazines, and anticholinergics
- Cardiovascular disease

WHAT TO DO IN HEAT EMERGENCIES...

First Aid

1. Have the person lie down in a cool place. Elevate the person's feet about 12 inches.
2. Apply cool, wet cloths (or cool water directly) to the person's skin and use a fan to lower body temperature. Place cold compresses on the person's neck, groin, and armpits.
3. If the person is alert, give cool water or sports beverages. It's advisable to drink slowly and steadily, particularly if they are experiencing nausea.
4. For muscle cramps, give beverages as above, and massage and stretch affected muscles gently, but firmly, until they relax.
5. If the person shows signs of shock (bluish lips and fingernails, and decreased alertness), starts having seizures, or loses consciousness, call 911 and continue cooling procedures, as described above.

DO NOT:

- DO NOT underestimate the seriousness of heat illness, especially

if the person is a child, elderly, or injured.

- DO NOT give the person medications that are used to treat fever (such as aspirin or acetaminophen). They will not help, and they may be harmful.

- DO NOT give the person salt tablets.

- DO NOT give the person liquids that contain alcohol or caffeine. They will interfere with the body's ability to control its internal temperature.

- DO NOT use alcohol rubs on the person's skin.

- DO NOT give the person anything by mouth (not even salted drinks) if the person is vomiting or unconscious.

PREVENTION:

- Wear loose-fitting, lightweight clothing in hot weather.
- Rest regularly in a cool area; seek shade when possible.
- Avoid strenuous physical activity in hot or humid conditions.
- Drink plenty of fluids every day. Drink more fluids before, during, and after physical activity.
- Be especially careful to avoid overheating if you are taking drugs that impair heat regulation, or if you are overweight or elderly.
- Be careful of hot cars in the summer. Allow the car to cool off before getting in.
- Avoid heavy meals and hot foods.

For more information on how to cope with the heat, ask your Concentra health professional, or visit the CDC's Web site at: www.cdc.gov/niosh/topics/heatstress/

Quality Of Meals Should Not Change During Summer

Students shouldn't close the door on healthy eating habits during the summer, says a Baylor College of Medicine pediatrician.

"Certainly it is just as important to eat healthy over the summer as it is any other time of the year," said Dr. Teresia O'Connor, assistant professor of pediatrics – nutrition at BCM.

She offers the following tips for health summer eating:

- Incorporate fruits and vegetables in all meals.
- A healthy summer lunch should include a fruit, a vegetable, some form of protein and whole grains.
- Don't skip breakfast.
- Eat three meals a day with one to two snacks.
- Stay hydrated - water is the best and healthiest way to stay hydrated.
- Be aware of how much sugar is in beverages. While it's okay to drink a small amount of these beverages, primary drinks should be water and low-fat or skim milk.

Encourage children and teens to help prepare their own meals so they become responsible for their own healthy eating.
