

The VOICE

A Newsletter for the Residents of Teravista

Volume 5, Issue 5

May 2015

When I was six or seven years old, I witnessed the ocean drowning of a dear aunt. Although too young for the full scope of the tragedy to sink in, the thoughts and the images of that event have remained with me for almost 70 years.

No wonder that, when our young grandson started splashing in our swimming pool a dozen or so years ago, the thought of such an unfathomable occurrence never left our mind. We took every precaution possible, as I am sure the vast majority of parents, grandparents, relatives, caretakers and friends of so many young children do when they let their young ones swim in pools, lakes, rivers, water parks and more.

But the unimaginable does occur -- more often than we think.

Now that another swimming season approaches it may be the time to give "the unimaginable" some thought because if statistics tell the truth, drowning is all too imaginable.

The Centers for Disease Control and Prevention publishes the following grim statistic: From 1999 through 2010, a total of 46,419 deaths from unintentional drowning (including boating) occurred in the United States, an average of 3,868 deaths per year. That is an average of more than 10 drowning deaths each

and every day of the year.

But what is even more disturbing, unintentional drowning has become the leading cause of death from unintentional injury among children aged 1-4 years. It replaces deaths resulting from motor vehicle accidents as the leading cause of death from unintentional injury for boys aged 1-4 years. These child-drowning deaths occurred most often in a bathtub for children under one year of age and, in a swimming pool, for children aged 1-4 years. The latter location -- swimming pools -- accounts for more than 50% of all unintentional drowning deaths in that age group, according to the CDC.

At this point, the reader may ask, why the focus on younger children and swimming pools? While, of course, every drowning is an immeasurable tragedy, the loss of a toddler under such horrific circumstances in one's neighborhood pool, is bound to leave an indelible impression. That is what happened on a beautiful June day almost seven years ago at a nearby swimming pool. To be precise, on June 13, 2008, Colin Holst, a proud and

Host an International Exchange Student!

Across the US, families are welcoming talented and motivated high school students into their homes this Fall. Students come from over 60 countries and share your enthusiasm for education, personal growth, and cultural exchange.

MAKE A DIFFERENCE

If your family enjoys exploring new cultures and nurturing youth, please contact us to request more information about this amazing opportunity to share your life with a special young person and to learn how you can make a difference.

BRING THE WORLD HOME

- Share a new language and culture with your family
- Teach a student about American values and traditions
- Change the course of a student's life
- Increase cultural awareness in your community

30+ YEARS CONNECTING PEOPLE & CULTURES

Ayusa is a non-profit organization founded in 1981 to promote global learning and leadership through foreign exchange, study abroad, and leadership programs for high school students from the U.S. and around the world. For more information about hosting a high school foreign exchange student, please contact your local representative Vicki Odom at 832.455.7881 or vodom@ayusa.org or Ayusa at 1.888.552.9872 or by visiting the website at www.ayusa.org.

Hope4Minds Expands its Mission

to Support More Texas Children With Severe Brain Injuries

Less than four years after it was founded, a Southwest Austin nonprofit organization has decided that it's got more than enough hope to go around.

That's the thinking behind a new mission and a name change for the Southwest Austin nonprofit organization known as HOPE4JD, which was founded in 2011 to support families whose children suffered brain injuries due to nonfatal drownings. As of April, the organization will be known as Hope4Minds whose mission is to foster hope and enrich the lives of children with an acquired brain injury by providing support and education.

With a new name and more families to serve, Hope4Minds also will expand its community outreach services to include parent support groups and concussion baseline screenings, in addition to the services it already offers such as CPR/First Aid training and family care packages.

"Our board of directors and supporters see the opportunity to do

more and help more Texas families," says Ronda Johnson, executive director, Hope4Minds. "Our community rose to the challenge over the last few years, helping us make a difference in the lives of families in Austin, San Antonio and Dallas. Our work has showed us the needs of more children who are living with an acquired brain injury and whose families need our support."

According to the Texas Brain Injury Alliance, fewer than 1 in 20 children with acquired brain injury will get the rehabilitation they need for recovery. Injury may occur during events such as non-fatal drownings, choking, car accidents, sports and recreational activities, falls, lightning strikes and even abuse.

Since 2012, the organization has provided more than \$211,248 in services to families, 841 hours of recovery therapy services, nearly 100 family care packages to Texas hospitals and rehab centers, and free CPR training for 216 adults.

Let us make sure your biggest investment is structurally sound.

INSPECTIONS

Serving Central Texas Since 1979

STRUCTURAL REPORTS

Structural reports can be furnished in any of the following areas:

- Structural design of houses and apartments including superstructure, foundation and drainage.
- Structural inspections of houses and apartments including drainage, foundation, superstructure, as well as decks, pools and other structures.
- Identification of problems and recommended solutions
- Estimated Costs
- Inspection and Certification for structural repairs

Our reports are concise and easy to read. We keep your information confidential. Fees for services are based on the type of structure to be inspected and where it is located.

Jeffrey L. Tucker, P.E., a registered professional engineer in Texas, has been involved in structural design, inspection and repair of houses and apartments since 1965. He is uniquely qualified to perform structural analyses of wood frame structures and slab foundations; to inspect and offer assurance of structural integrity and/or repair recommendations and details.

MOSQUITOES

Mosquitoes can be very irritating and disrupt outdoor activities. They also are able to transmit various diseases to humans and animals. Mosquitoes are known to transmit heartworm in dogs and cats, and they can spread encephalitis (including West Nile Virus), Chikungunya, dengue, yellow fever, malaria and filariasis among humans.

Most female mosquitoes require a blood meal for egg production whereas males feed on nectar and do not bite. Eggs can be laid on the surface of water or in dry locations that are occasionally flooded by water. Some eggs are able to remain dormant under dry conditions for several months. Eggs hatch into larvae, or wigglers. Mosquito larvae live in water and feed on organic debris or microscopic plants and animals. Larvae molt into pupae which do not feed. Mosquito pupae spend the majority of their time at the surface of the water, only moving when disturbed.

Many things can help to reduce mosquito problems around the home. Eliminate all sources of standing water. Containers such as watering cans, buckets and bottles can turn into mosquito breeding grounds. Water should be drained from birdbaths, gutters, flowerpots and pet dishes at least once a

week. Children's wading pools should be emptied of water at least once a week and stored so they cannot collect water when not in use. Tree holes should be filled in with sand or mortar, or drained after each rain. Leaky faucets and pipes located outside should be repaired.

Areas that cannot be drained, such as ponds or large rain collection systems, can be stocked with mosquito fish that eat mosquito larvae. Dunks can also be used in these areas. Dunks are a small, donut-shaped product that contains *Bacillus thuringiensis var. israeliensis*. The donut disrupts the life cycle of the mosquito and is non-toxic to humans, amphibians and fish.

Avoiding peak hours when mosquitoes are active is probably the best method to avoid being bitten. When outside, wear loose-fitting, light colored clothing with long sleeves & long pants. Repellants containing active ingredients such as DEET, picaridin or oil of lemon eucalyptus can be effective to keep mosquitoes from biting when evening activities cannot be rescheduled. Other products such as citronella candles will also repel mosquitoes, but work best in enclosed areas.

THE VOICE

Colin's Hope (Continued from Cover)

happy four-and-a-half-year-old little boy went to “the big” pool -- a swimming pool close to Circle C Ranch -- just one day after graduating from swimming lessons and receiving his medal. Little Colin, age 4, enjoying a family weekend by the water. Colin was having a ball playing in the fountains and sprinklers with his friends, all moving around the pool together in a clump, playing and splashing and ducking in and out of the water.

Suddenly, in an instant, Colin wasn't with them. Time stood still as all eyes swept the pool looking for him, and then, only moments later, Colin was pulled from the shallow water unconscious and not breathing. Efforts to revive him at the pool were unsuccessful. Colin, the baby boy born “with a mop of dark hair that looked just like his mother,” died at the hospital the next day, having never opened his eyes again after his swim.

Out of this unimaginable tragedy, sprang a glimmer of hope -- even of good. Grief-stricken by their loss and shocked to learn the cruel toll drowning takes on children of Colin's age, Colin's family founded an organization dedicated to preventing such tragedies from befalling other families: Colin's Hope. Simply, “Colin's Hope envisions a world where children do not drown. Colin's Hope raises water safety awareness to prevent children

from drowning.”

As our weather warms up, as families once again head for our pools, lakes and beaches, please take time to familiarize yourself with water safety rules -- they might make the difference between a happy summer and the unimaginable. An excellent place to do such is ColinsHope.org. At Colin's Hope, learn about this wonderful organization's many water safety awareness programs, events, campaigns and resources. They all have one vision in mind: “A world where children do not drown. While at Colin's Hope, take a look at their on-line Water Safety Resources Hub,” take the “Water Safety Quiz” and please consider volunteering for one of their many activities and programs and making a contribution so that the “glimmer of hope” may become a bright light -- a reality, as much as possible -- for our children and grandchildren.
