The tournament is underwritten for the first year by Cypress Fairbanks Medical Center Hospital. Returning for its third year as the CFISD sponsor, which includes the opportunity to play with the CFISD Superintendent, Dr. Mark Henry, is IBI Group.

## Inspecting for bed bugs

Before the holiday travel season begins, it is wise to know what to look for when traveling so you do not bring home unwanted guests. Bed bugs are small, dark brown to reddish colored insects with no wings. Their bodies are oval and the color and size often depends on if the insect is engorged with blood. Immatures, or nymphs, resemble the adults but are smaller and lighter in color. Usually adults are about the size of a watermelon seed.

Most feeding occurs at night when bed bugs pierce skin while people sleep. The bugs inject a fluid while feeding that can cause some people (about 50%) to have an allergic response. The allergic response causes the skin to become irritated and itchy at the bite location.

After feeding (it takes about 12-15 minutes for a bed bug to become fully engorged), bed bugs crawl away into hidden areas- mattress seams, headboards, nightstands, behind baseboards as well as other locations. They prefer to hide in locations that are close to where they feed, but they will crawl several feet to get to a meal. Bed bugs hide in their chosen location for about 3 days while they digest

the blood meal. Over time, congregation areas become marked with blood, fecal material, hatched eggs and cast skins of molted bugs.

When travelling, always inspect rooms thoroughly for bed bugs before moving luggage into the room. Luggage should be placed until the bathtub until the room has been inspected. Make sure to carry a small flashlight with for to help with inspection. When you return home, place clothing in the dryer (before washing) on high heat for about an hour.

Tips on inspection:

- Look in sleeping areas (bed, pull-out couches)
- Inspect linens as they are removed from the bed
- Check mattress and box spring seams, bottom of the box spring and near the mattress tag
- Inspect the dust ruffle
- If possible, lift the boxspring and inspect the bed frame
- If possible, pull out or remove the headboard to inspect behind it
- Check bedside tables and everything on them, including opening

all drawers

If you find bed bugs, go to the front desk to inform them of what you found and request a different room. Do not get a room that is adjacent, above, below or across from the infested room (bed bugs can travel through wall voids to adjacent areas).
