Community Permits and Tags

Fishing Tags

Each residence shall be given two orange Fishing Tags that must be carried at all times when fishing off public docks in our community. Police do not know who lives here and are instructed to stop and check at random for Orange Fishing permits that show you are a resident of Windermere Lakes. **NO TAG=NO FISHING**. If caught without a fishing tag, you will be asked to stop fishing immediately and return home to retrieve your fishing tag.

Fishing License Permits

Windermere Lakes is considered a private lake operating under the guidance and jurisdiction of the Wildlife and Fisheries Department and because of this your "Fishing License" must be current. You can be fined if caught fishing off public or personal docks without a current license.

Parking Tags

Each car that is parked in the Windermere Lakes Community must have a Round Parking Permit on: Back windshield- middle top position of the car. This allows patrolling officers to know if a strange car is in our community. If checked the cars must be registered at your address as the owner and operator.

Boat Tags

Boat Tags are very important as many times boats become untied and float off to other areas of the lake. Lake rules imply that if a boat is found, it is kept for 30 days. If not claimed by its owner, the boat will be considered free property. Same rules apply to boats that are left to sink, damaged or deserted.

ASSASSIN & AMBUSH BUGS

Assassin and ambush bugs are predators and are considered beneficial insects. They are generalists that attack a variety of caterpillars, flies, and other bugs. These predators either stalk their prey or wait to ambush prey when they come to a plant. Prey is stabbed with tube-like mouthparts, paralyzed with a toxin, and body fluids sucked up.

Assassin and ambush bugs have 3 segmented piercing-sucking mouthparts. These bugs come in a variety of colors with assassin bugs usually being darker in color than ambush bugs. Assassin bugs also have a more elongated head compared to ambush bugs. Ambush bugs have thickened front legs used to capture and hold prey. Immatures, or nymphs, look similar to the adults but do not have fully developed wings. Eggs are usually deposited in masses and are cylindrical in shape.

While most assassin bugs are beneficial, the kissing bug or cone-nose bug is considered a pest. Kissing bugs feed on blood of mammals, including humans.

For assassin bugs that are feeding on insects, control is not required. For more information on kissing bugs see this site <https://kissingbug.tamu.edu/>

For more information or help with identification, contact Wizzie Brown, Texas AgriLife Extension Service Program Specialist at 512.854.9600. Check out my blog at www.urban-ipm.blogspot.com
