A NEWSLETTER FOR VILLAGES OF NORTH POINTE

MAY 2017

TOMBALL ART LEAGUE

MAY 13

Join us for the last meeting of the league year before the summer break. TAL meets at 9:30 a.m. the second Saturday of most months for a short business meeting followed by a guest artist art demonstration. Meetings are held in the Amegy Bank Building, 2nd floor, at Hwy 249 and Medical Complex drive in Tomball. No meetings during June and July. If you can't join us in May, plan to get involved with the league and art community starting with the August meeting. For more info: www.thetomballartleague.com

Acts of Wisdom Golf Tournament

Friday, May 12,
2017
1:30 pm
Houston National
Golf Course
16500 Houston
National Blvd,
Houston, TX 77095

Join Us for a day of FUN, FOOD, and GOLF benefiting ACTS of Wisdom, a faith-based, non-profit organization that seeks to provide quality education to children in rural Africa.

Cost: \$115 Free range balls, cart, green fees, two drinks on course, tournament prize, and dinner. (If you do not have a foursome, we will pair you with others)

All proceeds benefit Acts of Wisdom and help to expand our

presence in rural Africa to help give more children the materials they need for school. For a registration form or to be a sponsor at any level, please go to actsofwisdom.com.

ACTS of Wisdom grew out of founder Pastor Brad Otto's experiences in Ethiopia and the Book of Acts where an Ethiopian Eunuch asks the Apostle Philip about Jesus. Philip is stunned that he doesn't know, to which the eunuch replies, "No one has ever taught me." Part of the cycle of poverty is not having access to quality education, or having inadequate supplies for education. 145 million children in the world do not have access to education, yet children still dream of becoming doctors, lawyers, and teachers.

At ACTS of Wisdom we believe every child, everywhere, should have access to education and to teachers willing to take time to teach them. Our hope is that through bettering the education opportunities of children, we might be able to help end the cycle of poverty, and begin to have peace in our world.

The Houston Choral Society Presents "Music Fit for a King" May 6, 2017

The Houston Choral Society (HCS) culminates its 30th season with magnificent and regal works in its Music Fit for a King concert on Saturday, May 6 at 7:30 PM at The Foundry United Methodist Church.

This inspiring concert, directed by HCS Artistic Director Dr. Kevin M. Klotz, features Handel's "Coronation Anthem Zadok the Priest," Mozart's "Coronation Mass," and John Rutter's "This is the Day" that was composed for the wedding of HRH Prince William and Miss Catherine Middleton.

Handel composed his four coronation anthems between September and October 1727, producing some of the most spine-tingling choral music of the Baroque period. Zadok the Priest is by far the most popular of the four. Composed for the coronation of King George II of England in 1727, this anthem has been performed at every coronation since then. Its adrenaline rush of an introduction, with its teasing promise of release only to start again, is only a warm-up for what is to come. As the regal strings build, it's still a surprise when the trumpets and choir burst onto the scene with their triumphant outpouring of joy, gradually climaxing in a full seven-part choir singing 'God save the King!'

Mozart's triumphal Mass in C Major, K. 317, is one of his most

popular and enduring works. It is known as the Coronation Mass, a nickname it acquired following a performance conducted by Antonio Salieri in 1791 in Prague at the coronation of Leopold II as King of Bohemia. This festive setting of the mass combines soloists, chorus, and orchestra in a brilliant and virtuosic style. In addition, Mozart uses the same thematic ideas from the first movement in the final movement, bringing a sense unity to this magnificent and rousing composition!

In addition, the 75-member chorus will be singing two numbers specifically composed for the coronations of British Royalty - C. Hubert H. Parry's "I was Glad When They Said Unto Me" composed for the coronation of King Edward VII in 1902 and Ralph Vaughn Williams' "O Taste and See" that was composed for the coronation of Her Majesty Queen Elizabeth II in 1953.

"On this concert, we are featuring works that were performed at royal celebrations," said Dr. Klotz. "Come and experience the dramatic and rousing quality of these compositions as the Houston Choral Society presents some of the most magnificent and regal music ever written!"

Guest soloists for this concert are soprano Cynthia Clayton,

mezzo-soprano Sonja Bruzauskas, tenor Nicholas Szoeka, and bass Leon Turner.

Ticket prices are \$25 for adults, \$20 for seniors/students/veterans, and \$10 for children ages 5 and younger. Group rates are available. Tickets are available online at www.houstonchoral.org. Tickets may also be purchased at the door. The Foundry United Methodist Church is one of the premiere choral venues in Houston with extraordinary acoustics. It is located in northwest Houston at 8350 Jones Road, Houston, TX 77065 with easy access from Highway 290.

AHFC Junior Hurricanes (JHSL) Soccer Fall Tryouts & Evaluations May/June 2017

Albion Hurricanes FC (AHFC), established in 1989, is leading the way in South Texas youth soccer by inspiring and developing young men and women through world class coaching and innovative techniques, as well as instilling the proper framework, self-esteem, confidence and sportsmanship within our athletes.

AHFC has multiple campuses in and around Houston. The club invites all interested players from the ages of 7 to 18, to the Player Tryouts & Evaluations and to become part of our success. We ask that all interested players pre-register before coming out to the fields. Please visit albionhurricanes.org for details about your particular campus.

AHFC offers JHSL (a recreational program for 5 - 10 year old) at our Cy Fair and Central locations and offers additional training at Katy Friday Night Academy.

Visit albionhurricanes.org for times and dates.

TEXAS A&M
AGRI LIFE
EXTENSION

MOSQUITO REPELLENTS

As mosquito season is ramping up, everyone is (hopefully) aware of possible disease transmission by mosquitoes. It is important that you protect yourself when spending time outside.

Activity times for mosquitoes can vary. Most people are familiar with the four D's- DRAIN (standing water), DEET (wear some repellent), DUSK & DAWN (stay indoors during dusk and dawn to avoid peak populations) and DRESS (wear long sleeves and long pants). While this is still good advice, it may be a good idea to spread the dress and repellent advice for anytime you spend time outdoors.

When outside, wear long pants and a long sleeved shirt in light colors to reduce the number of mosquitoes that can reach your skin. Repellent should only be applied to clothing and exposed skin. Do not apply repellent underneath clothing! If you want to apply repellent to your face, spray your hands with repellent and rub it onto your face. Do not spray repellent directly into your face or near eyes or mouth. Make sure to apply repellent outdoors. Do not allow children to handle repellents. Wash hands before eating, smoking or using the restroom.

The Center for Disease Control (CDC) recommends using a product registered with the EPA (Environmental Protection Agency) containing one of the following active ingredients: DEET, picaridin, IR3535 and some of the products containing oil of lemon eucalyptus.

DEET, also known N,N-diethyl-m-toluamide or N,N-dimethylbenzamide, was developed by the U.S. Army in 1946 to protect soldiers in insect-infested areas. Pesticides containing DEET have been used by the general public since 1957. Products containing DEET should not be used on children younger than 2 months of age (read the label and check with your pediatrician if you have questions). DEET has a slight odor and may have a greasy feel to some people. It may damage plastic, rubber, vinyl or synthetic fabrics. DEET may be irritating to the eyes and skin for some people. DEET comes in a wide variety of concentrations, so choose the one that will work best for your situation.

Picaridin was first made in the 1980's and resembles a natural compound called piperine (which is found in plants used to produce black pepper). Picaridin has been used in Europe and Australia for

THE COMPASS

(Continued from Page 7)

many years, but has only been in the U.S. since 2005. Picaridin is non-greasy and is odorless.

IR-3535, or 3-[N-Butyl-N- acetyl]-aminopropionic acid, ethyl ester, was developed in the mid- 1970's and became registered for use in the U.S. in 1999. It is registered as a biopesticide by the EPA because it is functionally identical to a naturally occurring substance (an amino-acid). It may dissolve or damage plastics and may be irritating to the eyes.

Oil of lemon eucalyptus (OLE) or PMD (para-menthane-3,8-diol) are essentially the same thing; PMD is the synthesized (lab created) version of oil of lemon eucalyptus. "Pure" or "essential" oil of lemon eucalyptus is not labeled as a repellent and has not undergone testing and should not be used as a repellent product. OLE/PMD has been on the market in the U.S. since 2002. OLE/PMD should not be used on children younger than 3 years of age. The natural product (OLE) has known allergens within it while the synthetic version (PMD) has less of a risk to allergens. This product is classified as a biopesticide. OLE/PMD has a varying range of residual, some offering about 20 minutes of protection while other products may last up to two hours.

Many factors play into how long a repellent will last for a person.

Some of these are:

- The concentration (or percent of active ingredient) of the product. You can find the percentage on the product label.
- Person's attractiveness. Some people are more attractive to

mosquitoes than others (and no scientific research has proven that it is because of eating garlic, taking vitamin B, using tobacco products, etc.). A person's genetic code plays a large part on what makes a person so attractive to mosquitoes.

- Frequency and uniformity of application. In other words, how often is the repellent applied and how good of coverage did you get?
- Activity level of the person. The more active the person is, the more sweat they produce which can cause the repellent to wash off the surface of the skin.

As a word of caution, there are products that combine sunscreen and insect repellent. The CDC recommends that if you need sunscreen and repellent, that you choose two separate products. Sunscreen should be applied more often than repellents.

HARDIPLANK®

NATURE'S CLEAN-UP CREW

By Cheryl Conley, TWRC Wildlife Center

You always know when an animal has met an untimely and unfortunate death when you see Black Vultures or Turkey Vultures. So how can you tell the difference? The Black Vulture has a featherless black-grey head while the Turkey Vulture has a featherless red head. In flight, the Black Vulture is distinguishable by

white-tipped wings whereas the majority of the underside of the Turkey Vulture is pale in color.

Both species of vultures feed primarily on carrion. Most of what vultures eat would make any other animal very sick but they are strong animals with an incredible digestive system and a very strong immune system. Their stomachs are extremely acidic. They can usually survive eating carcasses infected with botulism, anthrax, cholera and salmonella. Some believe that vultures spread disease because they eat dead meat. Actually, the opposite is true. They rid our environment of what could potentially cause the spread of diseases.

Turkey Vultures use their eyesight and keen sense of smell to find their food. By flying low, they are able to see dead animals and detect the gases produced when an animal begins to decay. They prefer to feed on animals that are recently dead. Black Vultures can't smell but will often follow Turkey Vultures to find food.

The breeding season of the turkey vulture starts in March,

peaks in April to May, and continues into June. Interestingly, vultures don't make nests. In most cases, females lay two eggs but have been known to lay one and rarely three. The eggs are whitish/cream colored and heavily marked with dark brown or lavender spots around the larger end. Eggs are generally laid on a bare surface in a protected location. TWRC receives many calls from the public reporting that a vulture took up residence in their atrium or on their front porch.

Both parents incubate, and the young hatch after 30 to 40 days. Chicks are altricial, or helpless at birth. Both adults feed the chicks by regurgitating food for them, and care for them for 10 to 11 weeks. When adults are threatened while nesting, they may flee, or they may regurgitate on the intruder or feign death. If the chicks are threatened in the nest, they defend themselves by hissing and regurgitating. Family groups will remain together until fall.

Although not endangered, vultures have been impacted by the use of lead bullets and buckshot used by hunters. If the shot animal is not removed or covered, vultures will consume the contaminated meat and become ill or die.

Because of their eating habits and appearance, vultures would probably never win a "My Favorite Bird" contest or "Most Beautiful Bird" award but they play an important role in keeping our environment cleaner and definitely smelling better. Have you thanked a vulture today?

If you'd like to learn more about TWRC Wildlife Center, what we do and how you can help, visit our website at www.twrcwildlifecenter.org. Opportunities are available at our wildlife center and include baby bird and opossum feeders. We also provide training for in-home rehabilitators. TWRC Wildlife Center, 10801 Hammerly Boulevard, Houston, TX 77043. 713-468-TWRC.
