INTRODUCING "Get To Know Your Neighbors"

We are all very fortunate to call Blackhorse Ranch home. But, Blackhorse Ranch is more than just a place to live; it is a vibrant community brimming with family-friendly neighborhoods, chock-full of fascinating, talented people. Our variety is what makes us so both unique and extraordinary. However, sometimes, we get so busy, we lose sight of how interesting and diverse we've become. We believe that getting to know the people who live nearby will help us create a sense of belonging and shared identity. We have created a column entitled, "Get to Know Your Neighbors" which we hope will strengthen connections, build trust in our wider community, and contribute to a happier neighborhood for everyone.

If you know of a person or a family that you believe is making Blackhorse Ranch a better place to live, please let us know. We would like to introduce them to your neighbors.

Don't Spend Your Holiday in the Hospital

Physicians encourage safety while celebrating Independence Day

The upcoming Independence Day holiday may have people thinking about fireworks, barbecues, and outdoor activities. However, they are the very same activities that can make the holiday a dangerous one. In fact, according to the National Safety Council, Independence Day is one of the most dangerous holiday weekends of the year. Physicians and staff at the Memorial Hermann Convenient Care Center in Cypress want to remind people to stay safe while celebrating.

"We see a lot of heat and firework related injuries during the Fourth of July holiday weekend. Parents may not think about it, but even sparklers can cause serious burns," says Marco Garza, M.D., a board-certified emergency medicine physician and Medical Director of the Emergency Center at Memorial Hermann Convenient Care Center in Cypress. The Consumer Product Safety Commission reminds parents that sparklers can burn at a temperature of 2,000 degrees.

The CPSC also offers these tips to use fireworks more safely:

- Follow local laws
- Do not allow young children to play with fireworks and older children should have adult supervision
- Never have any portion of your body directly over a firework while lighting

- Keep a bucket of water nearby for emergencies

If a person is burned by a firework, the injury may need immediate care.

"Any burn involving your face, hands, feet, genitals or over a major joint should get medical attention. If the burn is larger than your hand, or a blister forms soon after the injury, you should go to the emergency center or call 9-1-1," adds Dr. Garza.

The summer heat can also prove dangerous over the holiday weekend.

"It's no secret that it's hot here in Texas. Spending too much time in the sun can lead to everything from sunburn to heatstroke," reminds Dr. Garza. Physicians encourage people to stay hydrated, use sunscreen, and take a break from the sun when possible.

"If you do choose to drink alcohol over the holiday weekend, it's even more important that you also drink plenty of water. Excessive alcohol consumption can cause dehydration. Dehydration combined with the Texas heat can make for a dangerous situation," advises Dr. Garza.

If an emergency does arise, the Memorial Hermann Convenient Care Center in Cypress offers a 24-hour emergency center at their location at 27700 Northwest Freeway in Cypress, Texas. The Convenient Care Center also offers access to primary care

TICK CONTROL IN THE YARD

This article covers what to do about ticks in your yard. I didn't want to make it too long, so I decided to just link to sources giving information on how to treat pets or yourself/ family.

Ticks are arachnids with two body regions, eight legs (except the first stage out of the egg has only six legs and is called a seed tick), and no antennae. Ticks come in a variety of sizes depending upon if they are nymphs or adult, male or female, engorged or not. Ticks require a blood meal before molting to the next stage of their development as well as adult females requiring a blood meal before laying eggs.

Since ticks can feed on multiple hosts during their lifetime, including humans and other animals, they are capable of transmitting disease organisms through their bite. For more information on diseases transmitted by ticks see this link:

<https://www.cdc.gov/ticks/diseases/index.html>

Ticks wait hosts by climbing up vertical surfaces such as vegetation, fences or shrubbery. When a host brushes past, ticks grab on and locate a suitable spot for feeding. To reduce ticks in your yard you

can try some or all of the following:

- Keep grass mowed
- Clear brush, weeds, or overgrown areas
- Discourage wildlife
- Remove debris from the yard
- Treat yard with insecticide making sure to go up surfaces as ticks will climb upwards to grab onto a passing host
- Treat pets

For information on how to deal with ticks on your pet(s) see this source: https://www.cdc.gov/ticks/avoid/on_pets.html

For how to avoid getting, properly inspecting for, or removing ticks from yourself or family members see this source:

https://www.cdc.gov/ticks/avoid/on_people.html

DID YOU KNOW THIS IS ILLEGAL?

By Cheryl Conley, TWRC Wildlife Center

Little did Ernesto Pulido know that he was breaking the law when he disturbed the nests of egrets and black-crowned night herons while trimming trees for the U.S. Postal Service in 2014. He was charged with a misdemeanor violation of the

U.S. Migratory Bird Treaty Act of 1918 and because he showed remorse, was only fined \$3,000 to cover the cost of rehabilitating the injured baby birds. He could have been fined \$15,000 and faced six months in jail.

Most people are totally unaware of the Act and that it is one of the oldest wildlife protection laws on the books. Simply stated it's a law that protects birds from people. In 1916 the United States entered into a treaty with Great Britain (acting on behalf of Canada) whereby the two countries agree to end the hunting of insect-eating birds and established hunting seasons for game birds. In order to implement the treaty, the Migratory Bird Treaty Act was passed in 1918 by Congress which makes it illegal to "pursue, hunt, take, capture, kill," or "sell" a migratory bird or any of its parts, including nests, eggs, and feathers except under the terms of a valid permit issued pursuant to Federal regulations. The Act mostly came about because birds were needlessly being killed for their feathers which made great fashion accessories. Entire birds were stuffed and attached to the tops of hats. Birds were also being served in restaurants.

In 1936, the USA signed a similar treaty with Mexico. Japan and the Soviet Union were added in the 1970s. In 1972 an amendment to the Act added protection for an additional 32 families of birds including eagles, hawks, owls and corvids. Since then more species have been added to include almost every native species in the USA with a few exceptions like the House Sparrow, the European Starling and the domestic pigeon. Some of the birds don't actually migrate but are still protected under this Act. For a complete listing of protected birds go to:

<https://www.fws.gov/birds/management/managed-species/migratory-bird-treaty-act-protected-species.php>.

It wasn't until 2013 that the Department of Justice enforced the Act for the first time by penalizing a wind farmer for killing Golden Eagles and other birds at two sites in Wyoming. The farmer was fined \$1 million. A second wind farmer was penalized a year later and fined \$2.5 million.

So what does all of this mean to you? Let's say a bird builds a nest above your front door and drops poop everywhere. Can you remove the nest? NO—it's illegal. Can my son take bird

eggs to school for show and tell? NO—it's illegal. We collect bird feathers. Is this okay? NO—it's illegal. I found a nest and I brought it in the house. ILLEGAL. We found a dead Blue Jay and we want to have it "stuffed" for display. Guess what? ILLEGAL. We live on a farm and randomly shoot birds for fun. Is this legal? NO, NO, NO. In July 2007, a man was sentenced to six months in a federal halfway house, five years probation with no contact with firearms, and a fine of a \$65,000 fine for killing protected birds on his property.

Although this law may seem a little silly to the average person, it does serve a purpose. It reminds us that we must learn to live in harmony with wildlife and not purposely disrupt or cause harm to other living beings.

TWRC Wildlife Center serves a great purpose as well. We help wildlife that has been injured, orphaned or displaced and return them to the wild. Your donations help us keep the doors open and allow us to provide this service to the public free of charge. Please see our website for more information on what we do and how you can help. www.twrcwildlifecenter.org
