How Can I Get in Ski-Shape?

By Kelly Cunningham, MD, Sports Medicine specialist and Founder, Austin OrthoBiologics

Dr. Cunningham spent 15 years as a traveling doctor for the men's Olympic downhill team, accompanying the athletes throughout the US, Canada and Europe on the World Cup tour. He was able to pick up tips from some of the world's finest altitude athletes and their trainers.

Ski conditioning begins about 6 weeks prior to travel, and involves three phases:

- Muscle training
- Stamina
- Agility

Muscle training for the skier or boarder utilizes stretching, closed & open-chain strengthening exercises, and emphasizing the core muscle groups of the spine, hips, quadriceps & hamstrings. For most recreational athletes, low-weight/high-repetition sets will be best. Another option may be a personal trainer or workout club pro to help you design a program to strengthen your core without over-stressing your joints. Joint pain is a common skier injury so muscle training will aid in prevention.

Stamina is crucial for a recreational athlete, especially at altitude. (That's another discussion for later!) Cardio conditioning can be as simple as running, jumping on a bike or elliptical, preferably using "interval" periods to increase your heart rate. Sports like tennis, swimming, and basketball have built-in interval training as part of the sport.

Speaking of sports, these are great for honing the athletic agility that helps prevent ski injury, especially at the end of a long, fatiguing ski or snowboarding day. These are "ski-adaptive" sports. "Ski-specific" training involves side-to-side training tools that focus on the specific ski muscles and coordination. Slide boards, closed-chain waist belt regimens, in or out of ski boots, are popular.

The goal is to decrease fatigue-related injury but also to increase

your enjoyment, help you relax, and enjoy the sport!

If you have a history of joint pain or arthritis (DJD), consider your options before you head to the slopes— perhaps 3 to 4 weeks before your trip, you might want to explore PRP or stem cell injectable treatments in Austin as a autologous, potentially regenerative medicine alternative to steroids to ensure that you get the most out of your trip.

Austin, Texas, resident Kelly Cunningham, MD is board certified by the American College of Orthopedic Surgeons, and an active member of the Arthroscopy Association of North America and the International Cartilage Repair Society

HEART GALLERY OF CENTRAL TEXAS

It's a new year and time for new beginnings! The children featured in the Heart Gallery of Central Texas are waiting for their own new beginning - a forever family! Meet 12 year old Jonathan! Jonathan loves sports, especially football. He enjoyed his summer football camp and

was even named Most Valuable Player by his team! Jonathan does well with his schoolwork and enjoys making friends at school.

Learn more about Jonathan as well as foster care and adoption here in Central Texas by visiting our website: heartgallerytexas.com

It's Another New Year...

“Happy New Year!” That greeting will be said and heard for at least the first couple of weeks as a new year gets under way. But the day celebrated as New Year’s Day in modern America was not always January 1.

ANCIENT NEW YEARS:

The celebration of the new year is the oldest of all holidays. It was first observed in ancient Babylon about 4000 years ago. In the years around 2000 BC, the Babylonian New Year began with the first New Moon (actually the first visible crescent) after the Vernal Equinox (first day of spring). The beginning of spring is a logical time to start a new year. After all, it is the season of rebirth, of planting new crops, and of blossoming. January 1, on the other hand, has no astronomical nor agricultural significance. It is purely arbitrary. The Babylonian new year celebration lasted for eleven days. Each day had its own particular mode of celebration, but it is safe to say that modern New Year’s Eve festivities pale in comparison. The Romans continued to observe the new year in late March, but their calendar was continually tampered with by various emperors so that the calendar soon became out of synchronization with the sun. In order to set the calendar right, the Roman senate, in 153 BC, declared January 1 to be the beginning of the new year. But tampering continued until Julius Caesar, in 46 BC, established what has come to be known as the Julian Calendar. It again established January 1 as the new year. But in order to synchronize the calendar with the sun, Caesar had to let the previous year drag on for 445 days.

THE CHURCH’S VIEW OF NEW YEAR CELEBRATIONS: Although in the first centuries AD the Romans continued celebrating the new year, the early Catholic Church condemned the festivities as paganism. But as Christianity became more widespread, the early church began having its own religious observances concurrently with many of the pagan celebrations, and New Year’s Day was no different. New Years is still observed as the Feast of Christ’s Circumcision by some denominations. During the Middle Ages, the Church remained opposed to celebrating New Years. January 1 has been celebrated as a holiday by Western nations for only about the past 400 years.

NEW YEAR TRADITIONS: Other traditions of the season include the making of New Year’s resolutions. That tradition also dates back to the early Babylonians. Popular modern resolutions might include the promise to lose weight or quit smoking. The early Babylonian’s most popular resolution was to return borrowed farm equipment. The tradition of using a baby to signify the new year was begun in Greece around 600 BC. It was their tradition at that time to celebrate their god of wine, Dionysus, by parading a baby in a basket, representing the annual rebirth of that god as the spirit of fertility. Early Egyptians also used a baby as a symbol of rebirth.

AULD LANG SYNE: The song, “Auld Lang Syne” is sung at the stroke of midnight in almost every English-speaking country in the world to bring in the new year. At least partially written by Robert Burns in the 1700’s, it was first published in 1796 after Burns’ death. Early variations of the song were sung prior to 1700 and inspired Burns to produce the modern rendition. An old Scotch tune, “Auld Lang Syne” literally means “old long ago,” or simply, “the good old days.”

SPECIAL NEEDS FORUM PRESENTS

How Much Savings Do I Need to Help Provide for my Child's Lifetime?

The Special Needs Forum continues its free workshop series designed to educate families who have a loved one with special needs.

The next Special Needs Forum live event of the 2017-2018 school year will be held on Thursday January 11, 2018 and on the topic; How Much Savings

Do I Need to Help Provide for my

Child's Lifetime? Many people with

a child with special needs are concerned and want to know how much savings is needed to ensure their child is cared for a lifetime. Learn from professional financial advisors about how much savings and social security your child will require.

Location: 6200 Bridgepoint Parkway
Building IV, 2nd floor
(take right off the elevator and main room will be immediately on the left)
Austin, TX 78730

Date: Thursday January 11, 2018

Time: 11:30 am - 1:00 pm

Fees: Complimentary

The Special Needs Forum is an educational resource for families who have a loved one with special needs. During the workshops you will socialize with other families, get to know businesses who specialize in helping the special needs community and learn valuable information.

This year's lineup includes a Panel of special education experts, admissions directors from various residential communities and a specialist from the Social Security Administration.

Parents and guardians of children with special needs as well as those who teach and work in the special needs care industry are invited to attend. Each Special Needs Forum workshop includes an informative presentation by a keynote speaker and a question and answer segment.

To register and to view upcoming sessions, visit specialneedsforum.org.

NATURE WATCH

DABBLERS AND DIVERS

by Jim and Lynne Weber

Wintertime is the perfect time to look for ducks in Central Texas. Several species that breed far north of our state's border return to Texas in the colder months to feed in our unfrozen freshwater lakes and rivers. From the Old English 'duce', the word duck is a derivative of the verb meaning to duck or dive, or bend down low as if to get under something. It best describes the way many ducks feed, by upending or diving under the water in search of a wide variety of food sources, such as small aquatic plants, grasses, fish, insects, amphibians, worms and mollusks. Most ducks fall into either the dabbler or diver category. Dabblers feed on the surface of the water, and sometimes on land, while divers disappear completely beneath the surface and forage deep underwater. In general, divers are heavier than dabblers, which gives them the ability to submerge more easily, but they often pay the price by having more difficulty when taking off to fly.

Northern Shoveler

The most distinctive dabbling duck is the Northern Shoveler (*Anas clypeada*). True to its name, it possesses a two and a half inch long bill, which is spoon-shaped and has a comb-like structure called a pecten at the edge of its beak. The pecten is used to filter food from the water and to aid in preening its feathers. A medium-sized duck, the adult male (or drake) has an iridescent green head, rusty sides, and a white chest. When flushed from her nest, the adult female (or hen) will often defecate on the eggs, presumably to deter predators from eating them. This species of duck is monogamous, and stays together longer than any other known pairs of dabbling duck species.

American Wigeon

resembling a man's bald head. Its feeding behavior is distinctive among the dabbling ducks, as its short bill allows it to be much

more efficient at plucking vegetation from both the water and sometimes even agricultural fields. The diet of this duck has been shown to include a much higher proportion of plant matter than any other dabbler species.

Another common dabbler is the American Wigeon (*Anas americana*), whose population is increasing throughout its range. The male has a white crown, green face patch, large white patches in its wings, and a black rear end bordered by white. At one time this duck was known as 'baldpate' due to the white crown

Among the most abundant and widespread freshwater diving ducks is the Lesser Scaup (*Aythya affinis*). The male has a slight bump or peak on the back of the head, a bluish bill with a small black tip, grey sides (black on the ends with white in the middle), and a black head, chest, and rear end. When

Lesser Scaup

grasped by a predator like a Gray Fox, an adult Lesser Scaup may play dead, rendering itself immobile with its head extended, eyes open, and wings folded close to its body. They are capable of diving underwater the day they are hatched, but are too buoyant to stay under for long, until maturity gives them the body composition and strength they need to stay underwater for longer periods of time.

Ring-necked Ducks

Usually found on smaller, calmer bodies of water like ponds, Ring-necked Ducks (*Aythya collaris*) are more readily identified by the bold white ring around their bill that the subtle purplish band around their necks for which they are named. A medium-sized diving duck, they also have a small bump or peak on the back of their black heads, with the male having a black chest, back, and rear end, with grey sides and a white stripe up the shoulder.

The next time you visit a lake, river, or pond this winter, venture out to the quiet corners to see if you can spot one of our best known dabblers or divers!

Send your nature-related questions to naturewatch@austin.rr.com and we'll do our best to answer them. If you enjoy reading these articles, check out our books, *Nature Watch Austin* and *Nature Watch Big Bend* (both published by Texas A&M University Press), and our blog at naturewatchaustin.blogspot.com.
