## Did You Know?

Harris County Precinct 4 Constables, who cover our security contract, has an online services page that can answer many of your calls for assistance in the community. Go to <http://www.cd4.hctx.net/services.php> and you will find links for traffic complaints, extra patrol for suspicious activities, and the vacation watch form, which requests patrols of your residence while you are on vacation.

Harris County Precinct 2, who maintains and operates various public parks and community centers throughout Harris County, also maintains the public roads in Eagle Springs. "Curb-to-curb" is the jurisdiction of the county and is not maintained by Eagle Springs Community Association. To report a pothole or other problems in this area, you can click on <http://www.harriscountytexas.gov/servicerequestform/default.aspx?pct2> and request service.

Both of these links can be found on InsideEagleSprings.com in the "Who Do I Call?" tab found under the "HOA Information" fly out tab. Users must be registered to gain full access to the website.

## SPRING INTO ACTION

February and March are the time of year to begin planting seeds and bulbs for wildflowers and other spring time flowers. This is also the time of year to de-winterize your yard and flowerbeds. Springing into action now will give you a beautiful yard for the Spring. To de-winterize your yard; find a fertilizer that is made for use during the months of February and March, begin clearing out dead leaves from the bases of your shrubs and trees, and trim off any dead growth from shrubs and plants.

Some of you may be wondering what to do about your plants and trees that look like they might be dead due to the ice/snow storms. Experts suggest waiting until mid-February to trim back shrubs and plants. You want to leave the dead vegetation on the plant to help protect the root system from any late freezes we might have in our area. After mid-February trim down the plants and shrubs.

According to Randy Lemmon expert gardener, for Sago Palms you want to wait until you see new growth coming from the center of the palm before cutting off the dead leaves. He also suggests looking at the center cone and seeing if it looks fuzzy. If it is still fuzzy it is alive and you need to wait for new growth to appear.
