News for the Residents of Legends Ranch

Recognize a Great Neighbor

Every day, we hear inspiring and touching stories about our Legends Ranch neighbors supporting and improving our community in a variety of ways. Whether it's collecting trash from around our lakes and common areas, taking care of a neighbor's pet, or creating meal trains and rallying around a neighbor in need, we are constantly reminded of the power of good neighbors.

To nominate a good neighbor for recognition, please share a short story with us about what this person has done to make our community a better place to call home. Please ensure you include their name, your name and contact details and the reason for recognition in the email contents.

Email your nomination to: ranchreviewnewsletter@gmail.com.

Legends Ranch Prayer Warriors

Sometimes we just need a little extra help from the power of prayer. God is the right person for the journey. If you would like to request prayers for a special someone in their time of grief, ill-health or need please share your prayer requests to: ranchreviewnewsletter@gmail.com

Montgomery County MUD 89 Introduces Smart Meters MCMUD89

In the name of conservation and customer convenience, Montgomery County MUD 89 recently decided to install smart water meters. These meters have electronic sensors that measure water flow, which allows them to have more accuracy. With the use of a smart phone app, customers are able to keep a closer eye on their water consumption. The District will begin replacing the old mechanical meters with new digital ones. More information will be provide once the smart meters are being installed.

Hurricane Preparedness

Each year NOAA and the American Red Cross publishes a preparedness guide of tropical cyclones to help us prepare for such an emergency. You can download a copy of that guide at http://www.nws.noaa.gov/os/hurricane/resources/TropicalCyclones11.pdf. This guide gives great information on the metrological terms associated with tropical storms and what to expect from those storms. Most importantly, it lists critical information about how to prepare for an incoming storm.

Guidelines each year prior to hurricane season:

- Determine safe evacuation routes inland
- Learn locations of official shelters
- Check emergency equipment such as flashlights, generators and battery powered equipment such as cell phones and your NOAA Weather Radio All Hazards receiver.
 - Buy food that will not spoil and store drinking water.
- Buy plywood or other material to protect your home if you don't have it.
- Trim trees and shrubbery so branches don't fly into your home.
 - Clear clogged rain gutters and downspouts.
 - Decide where to move your boat if applicable.
 - Review your insurance policy.
 - Find pet friendly hotels on your evacuation route.

During the storm and when Pearland is in the warning area, you should:

- Closely monitor radio, TV or NOAA Weather Radio All Hazards for official bulletins.
 - Close storm shutters.

- Follow instructions issued by local officials. Leave immediately if ordered.
- Stay with friends or relatives at a low-rise inland hotel or at designated public shelter outside of the flood zone.
 - DO NOT stay in a mobile home or manufactured home.
- Notify neighbors and a family member outside of the warned area of your evacuation plans.
- Take pets with you, but remember that most public shelters do not allow pets other than service pets for people with disabilities.
 - Identify pet friendly hotels along your evacuation route. If you are staying home to "hunker" out the storm:
 - Turn refrigerator to maximum cold and keep it closed.
 - Turn off utilities if told to do so by authorities.
 - Turn off propane gas tanks.
 - Unplug small appliances.
- Fill bathtub and large containers with water in case clean tap water is unavailable. Use water in bathtubs for cleaning and flushing only. Do NOT drink it.
- Stay away from windows and doors, even if they are covered. Take refuge in a small interior room, closet or hallway.
 - Close all interior doors. Secure and brace exterior doors.
- If you are in a two-story house, go to an interior first floor room.
- If you are in a multi-story building and away from water, go to the first or second floor and stay in the hallways or other interior rooms away from windows.
 - Lie on the floor under a table or other sturdy object.

Help Make the World a Better Place

Did you know that by opening your home to a foreign exchange student you are taking on the role as a diplomat of the United States? Its true! Hosting a teenager from another country is form of public diplomacy – it gives both the host family and the student an opportunity to learn from each other, exchange cultural experiences and most of all, form life-long relationships.

All that is required of a host family is to provide three meals a day, a place for the student to sleep and a little bit of TLC thrown in. Students can share a room with a same sex sibling that is within three years of their age. The students all come with their own spending money, health insurance and an eagerness to be part of your family.

STS Foundation, a 501(c)(3) organization, is looking for volunteer host families for the 2019/2020 school year. We accept all different types of families, from single parents, to newly marrieds, to empty nesters to same sex couples. The application process is simple, once you are completely vetted, you will have access to our student database where you can select the student that best fits in with your family.

If you would like to find out more about hosting one of our wonderful students, please contact Vicki Odom at (832) 455-7881 or email at vicki.stsfoundation@yahoo.com. I can get you started in helping to make the world a better place to live.

Fall Webworms

Webworms can be found on a variety trees and are most well-known for the webbing they create on the tips of branches. Webworms are caterpillars, or larvae, of a moth. Caterpillars cause damage by feeding on foliage that is inside the protective webbing.

There are 2-4 generations of webworms that occur each year. The first generation appears April- May and the last generation occurs in the late fall. The last generation is the most damaging generation, which provides these creatures with the name fall webworm.

Webworm larvae are about an inch long when fully grown. They are pale green to yellow with tufts of long hairs projecting from their body. Most people notice webbing that webworms create on the tips of branches. Webworms feed within the webbing and use it as protection from predators. When the caterpillars run out of foliage to feed on, they expand the web to encompass new leaves.

To manage webworms, the size and accessibility of the tree needs to be considered. Egg masses can be pruned from trees before they hatch in early spring. Egg masses are on the underside of leaves and are covered with hairs. Small webs can also be pruned from the tree when they begin to form in the spring. Larger webs can be knocked out of the tree or opened with a stick or jet of water which will allow predators inside the web to feed on caterpillars. Do NOT use fire to burn the web from trees! This causes more damage to the tree than if the caterpillars continued to feed.

Insecticides are also available for webworm management. Look for active ingredients such as Bacillus thuringiensis var. kurstaki (this product specifically targets caterpillars), spinosad, azadirachtin, or pyrethrins. Webs need to be opened before treatment with a pesticide so that pesticide gets inside the web where caterpillars are located.

Please note that webbing will remain in trees even after

caterpillars are dead. Webbing needs to be removed by you or a strong weather event.

For more information or help with identification, contact Wizzie Brown, Texas AgriLife Extension Service Program Specialist at 512.854.9600. Check out my blog at www.urbanipm.blogspot.com

Ingredients:

34 cup of root beer

½ cup milk

2 T root beer concentrate

1 box (3oz) instant vanilla pudding mix

1 tub (80z) Cool Whip, thawed

1 ready-to-use graham cracker crust

Additional whipped cream and maraschino cherries for garnish (optional)

Instructions:

In a large mixing bowl, combine the root beer, milk, and root beer concentrate.

Sprinkle the vanilla pudding mix over it and whisk together for 2 minutes.

Fold in the thawed cool whip and mix together until well combined.

Pour into the prepared crumb crust and spread evenly.

Cover and freeze for at least 8 hours.

Garnish if desired.

Can be enjoyed straight from the freezer or thawed slightly.
