## PURPLE MARTIN MIGRATION

*By Cheryl Conley, TWRC Wildlife Center*

Everyone looks forward to the arrival of the Purple Martins each year. Most of us think their arrival means spring is just around the corner. But, at this time of the year, no one really thinks about them anymore. Most people don't know that they're very busy getting ready to migrate south.

Preparations for migration begin in July and August when the birds form large flocks and roost (a place where birds or bats regularly settle or congregate to rest at night). There can be thousands of birds in a roost. They call this gathering "staging." Some of the better-known roosts in the Houston area are Gordon Park in Stafford and around Willowbrook Mall. They spend their days eating flying insects to build up body fat for their long flight ahead.

So where do they go? In the spring of 2009, geolocators were attached to 20 birds from two Texas colonies. It was discovered that the birds wintered deep in the Amazon rainforest and traveled an amazing 250 to 300 miles per day! They can fly between 17 and 27 miles per hour unless a predator is chasing them when their speed can reach 40 miles per hour. They spend several months in South America in large roosts where they undergo their annual molt. Although their annual molt begins before migration, they don't molt their flight or tail feathers until they reach South America. Molting is very beneficial because it replaces damaged feathers and helps get rid of parasites.

Purple martins will spend several months in South America before heading back to North America. The scouts typically show up in our area in mid-January through early February. The term "scout" is used to describe the first martin(s) observed. They will go to the same nesting site from the previous year. The scouts can be either an older male or female but are usually males. Arrival of the remainder of the birds depends on their age and sex. Older male birds arrive after the scouts followed by the older females followed by the younger ones. The younger ones, or subadults,

may not appear until 4 to 12 weeks after the first ones arrive. They fledged the previous year so their first priority is to find a nesting site.

According to the Texas A&M AgriLife Extension Service, Texas martins nest almost exclusively in bird housing provided by humans. Once they have occupied a martin house, they will continue to use it year after year as long as you clean it out in the fall and keep the starlings and sparrows from moving in.

TWRC Wildlife Center has been serving the Greater Houston for 40 years. We admit nearly 5,000 injured, orphaned or displaced animals every year. Learn more about us at:

Jane Kelso Winter will provide brief history of Moms and deliver a presentation on "Be SMART" - (a program now endorsed by Conroe ISD) on how to safely secure guns in homes - and why you need to ask about guns in the homes of others (as toddlers most often the victims of unsecured guns in homes!)

Also, learn from our own Jennifer Lorenz, (and Legislative Lead for Moms N. Harris/Mont. chapter) how you can become active in helping push for universal background checks and extreme risk laws that are pending in the Senate right now.

All are welcome to attend and to join this growing club, which meets on the third Tuesday of every month.

## COCKROACHES

The common cockroaches found outside include the American and Smokybrown cockroaches. American cockroaches are about 1 ½ - 2 inches long, reddish-brown with yellow markings above the head. The adults have well-developed wings, but seldom fly; they do often glide. American cockroaches are usually found outside near decayed trees and plants, in crawl spaces and sewers. Smokybrown cockroaches are often mistaken with American cockroaches. Smokybrowns are about 1 inch long and dark brown to black. Adults have fully developed wings and are capable of flight. This species often inhabits leaf litter, compost piles and ground cover.

### American cockroach.

If you find cockroaches in your compost pile, in leaf litter or other outdoor locations, it isn't really necessary to kill them. You may want to make sure that your house is excluded to avoid having the outdoor cockroaches move indoors

when the temperatures cool down. The following tips may help:

- Prune back any vegetation touching or overhanging the home
- If you have a brick or stone façade, stuff weep holes with copper mesh
- Make sure screens are in good repair
- Replace weather stripping where doorways do not have a good seal
- Repair any water leaks
- Clean debris from gutters
- Place stainless steel screening over vent access in the attic
- Use sealant around pipe penetrations or other cracks or crevices into the home

## Be a Hero this Halloween

Being a hero goes beyond dressing up in a costume this Halloween season. Children, families and schools across the country can channel their own superpowers to help deliver lifesaving supplies to children in need this October.

One way to use your superpowers is to Trick-or-Treat for UNICEF, which began in 1950 when girls and boys across the United States collected coins in hand-painted milk cartons to help children affected by World War II. Celebrating its 69th year, this nostalgic tradition continues today as America's longest running youth volunteer program with generations of children running door to door holding signature orange boxes and singing, "Trick-or-Treat for UNICEF."

With over \$180 million raised for health care, education, nutrition and more, the program has evolved into a month-long celebration of the power of kids helping kids. Throughout October, kids, parents and teachers across the country can be real superheroes by collecting donations, big and small.

Equipped with the iconic orange boxes, families can raise funds that

add up to lifesaving change. As little as \$1 can provide safe water to a child for more than 2 months; \$3 can provide seven packets of therapeutic food; \$5 can provide a pack of 10 notebooks and \$7 can provide one warm fleece blanket for a child.

Halloween has become a "heroic" way to help others and build the next generation of global citizens. When kids trick-or-treat for a cause, they learn about global issues and feel empowered to make a difference.

Start creating real-world change by picking up your own little orange box. With the support of Visa Inc., the iconic box will glow in the dark, allowing superpowers to shine even brighter.

Visit [TrickorTreatforUNICEF.org](http://TrickorTreatforUNICEF.org) to download a DIY change box, donate online or find an event near you. Share your story on social media with #TOT4UNICEF, #WeCanAllBeHeroes and #KidsHelpingKids.
