## The Wildlife Drummers

*By Cheryl Conley, TWRC Wildlife Center*

Is it a red-headed woodpecker or a red-bellied woodpecker? One would think that the names are self-explanatory, right? One has a red head and one has a red belly. Both birds have red feathers on their heads so you might hear people tell you they saw a red-headed woodpecker when in fact it was a red-bellied woodpecker that they saw. A red-bellied woodpecker was named for an area on the lower front that is actually a light pinkish-rosy color—not really red. The top and back of the male's head is red. Females lack the red crown but do have a red patch on the nape of the neck. Red-headed woodpeckers have a solid red head, neck and the top of the breast.

Both red-bellied and red-headed woodpeckers are year-round residents in our area with the red-bellied being the most common.

They eat insects, acorns, other types of nuts, berries, fruit, seeds, and will also eat sap from trees, mice, and nestlings (baby birds). They like to store food in cracks and crevices of trees.

Woodpeckers like to use their beaks to “drum” on hollow limbs, utility poles, gutters or the siding of your house. This “drumming” is used to attract and communicate with potential mates, to communicate a food source to its mate or can be a call for help at the nest. They can drum up to twenty times a second.

The red-bellied female will lay up to five eggs. One egg is laid each day. Babies are fed by both parents for up to four weeks. Once they fledge, Mom and Dad will continue to look after them for another six or more weeks. The red-headed female will lay between four and seven eggs. Both parents feed the babies. What's unique about the red-bellies is that they can have two broods in the same season. They may still be caring for their fledglings while attempting to have their second brood.

Some interesting facts about woodpeckers are:

- Woodpeckers have stiff feathers near the nostrils that prevent small pieces of wood from getting into the nostril.
- They have extremely sharp claws for hanging on trees. There are four toes on each foot and the arrangement of the toes is called “zygodactyl.” The first and fourth toes are pointed backwards, the second and third face forward.
- The tail of the woodpecker has spikes that dig into tree trunks and helps to keep the bird anchored.
- Woodpeckers have extraordinarily long tongues. There is a barb at the tip for catching insects and grubs.

Texas Wildlife Rehabilitation Coalition (TWRC) is celebrating 40 years serving the greater Houston area. Thank you to all of our supporters and those that care about wildlife as much as we do. If you have questions or would like to volunteer, call 713.468.8972.

## Still on the Fence about Hosting an Exchange Student?

You don't have any kids? Are you a single parent? Same sex couple? An empty nester? This is not a problem, we place our students in all kinds of families!

You're not rich? Neither am I! Your exchange student comes with their own spending money and health insurance. All you provide is room/board and three meals a day. Oh and TLC...but that's free.

Live in the middle of no where? Small town? Not a big deal. Some kids prefer to get away from the hustle and bustle of big cities. The exchange students also do pretty well in small schools, as they usually get to be the center of attention and make friends rather quickly. Our students also get chances to travel to New York, Washington DC, Hawaii and California...so they can get their fill of the city life and return back to the peaceful sounds of nature.

Do you consider yourself a boring person? More than likely this is not true, and you should quit being so hard on yourself. Your student will make friends. Your student will meet other exchange students. Your student will attend activities offered by our program. Your student will get involved in sports and school clubs. Your purpose is not to entertain them. But you might find that you bring a little adventure to each others lives.

Kids are too young? Great! Lots of students love young kids, and your kids will love them. It's beneficial to introduce your kids to new cultures at a very young age. You're preparing them to accept people no matter what the religion, color of their skin, or language they speak. That my friend, is good parenting.

Don't hold back! This is a gret experience for both parties. You get the opportunity to change a child's life. You get the satisfaction of seeing them grow, even after they leave your home into becoming a doctor, a lawyer, a diplomat, artist, teacher...the list goes on. And you contributed to that success! And the best part of it all, is you gain another family member for life. We need people like you to give these kids a chance.

STS Foundation is a 501(c)(3) organization whose mission is to place exchange students in our area. If you are interest in hosting, please contact me at 832-455-7881 or at [vicki.stsfoundation@yahoo.com](mailto:vicki.stsfoundation@yahoo.com). I'll be happy to answer any question you might have and get you started on hosting your very own student!

## *Protect the World's Children this Holiday Season*

The holidays signal a time for family gatherings, traditions and the spirit of giving. Make this holiday season even more meaningful by giving gifts that help children in need around the globe.

According to UNICEF, around 15,000 children die every day from preventable diseases. In over 190 countries, the organization's staffers are in the field working through war zones, natural disasters and disease outbreaks, doing whatever it takes to save children's lives. This holiday season, you can join the charge by choosing gifts that give back.

With Inspired Gifts, you can provide supplies in the name of a loved one that get delivered directly to children who need it most. Just \$19 can provide polio vaccines to protect 100 children from the deadly disease. Additional life-saving and life-changing options including food packets, educational materials and menstrual hygiene kits can be found at [unicefusa.org/HolidayInspired](http://unicefusa.org/HolidayInspired).

If you are looking for stocking stuffers and unique finds, UNICEF Market has a vast collection of handcrafted items made by artisans from around the world. From blankets woven in India to recycled glass pitchers crafted in Mexico and more, these gifts help support the artisans and their families, keep traditional skills alive and give back to essential programs for children. Start checking off your wish lists at [unicefusa.org/HolidayMarket](http://unicefusa.org/HolidayMarket).

As part of Louis Vuitton's #MakeAPromise pledge, a specially designed product line of Silver Lockits is available, helping to protect children who have been exposed to diseases, natural disasters and other conflicts that threaten their safety and well-being. \$100-\$250 of each purchase go to programs that help children most in need. ## 5 Tips to Ward Off Cold Weather

Colder weather brings plenty of changes, especially in the ways you take care of your home and self. Especially when the temperature drops, extreme winter conditions can play havoc not only with your skin and health, but also your family's comfort.

Take steps to protect your family and household as the weather starts to cool this season with these practical tips:

*Take steps to help prevent the flu.* As temperatures drop, the chances of getting sick rise. That's partly because certain germs and viruses thrive in colder temperatures, and because the cold puts extra strain on your immune system. When it is cold outside, people are also more likely to spend time indoors (and in closer quarters) where germs are more easily spread. Do your part to help prevent the flu by washing your hands often and covering your mouth or nose when you cough or sneeze. Also be sure to stay home if you're sick and avoid exposing others to your illness.

*Prepare your wardrobe.* Colder weather outside means more skin sensitivities and dryness. Long pants and sleeves don't just add warmth; they also protect your skin from harsh outdoor elements. When you haul your winter wardrobe out of storage, start the season on a comfy note by washing everything with an option like 'all Free Clear Liquid Detergent or Mighty Pacs. It's the No. 1 laundry detergent brand recommended by dermatologists, allergists and pediatricians for sensitive skin due to its hypoallergenic formula.

*Dress in layers from head to toe.* Bundle up with winter accessories to match the daily weather forecast. For chillier mornings and nights, cover exposed areas such as your head with a hat, neck with a scarf and hands with gloves. To accommodate warmer weather during the day, layer flexible clothing options to accommodate temperature shifts.

*Stay active.* Physical activity naturally warms your body in the short term. In fact, shivering is your body's natural physical response to generate body heat when you're cold. Aside from the immediate benefits, keeping active during the colder months can help in other ways, too. A healthy cardiovascular system keeps your blood flow steady and strong, and a good circulatory system plays an important role in keeping your body, and especially your extremities, warm when temperatures take a dip.

*Nourish your body and skin.* Preventing painful dry cracks and itchy, scaly skin is a job that requires attention inside and out. Externally, moisturize shortly after showering to trap in the water lingering on your skin, use extra lotion throughout the day on areas prone to drying and reapply lotion after washing hands. Remember to protect sensitive spots like your lips that can easily chap and crack. You can also prevent dry skin by ensuring you're drinking plenty of water and eating a healthy diet with plenty of essential vitamins and healthy fats.
