SPIKING UP YOUR METABOLISM AT ANY AGE

It is a well-known phenomenon that our metabolism declines with advancing years. Some of that has to do with declining muscle mass, and some of it has to do with decreased hormones as well as the diminishing effectiveness of the digestive tract. But at any age, whether you are north of fifty or at the polar ends of the scale, there is much we can do to maximize our metabolism and live healthily and lean.

Metabolism is essentially all of the various chemical processes that occur within that wonderful chemistry set known as the human body. We often simply use the term to describe how your body turns food into energy. As we age the metabolism typically slows down by about 5% per decade after the age of about 40 years of age, but there is much we can do to avoid and arrest that occurrence. Estrogen levels decrease in women's bodies, causing insulin levels to rise, and the thyroid (the body's chief metabolism regulator) to decrease its output of thyroid hormones. These changes result in an increase in appetite, which when taken with a decrease in muscle mass, leads to an overall shift in the lean body mass/ fat ratio. The shift is not in a positive direction!

To keep your metabolism at its peak and fight this decline, you must focus on your digestive tract health, and enhancement of your muscle mass with a prudent exercise regime. Detoxification of the decades of build-up in the digestive tract is a good start to speeding up your metabolism. A very beneficial way to start each day to help remove the intestinal "clog" is to drink cleansing teas, or drink warm water and lemon. Also important is to drink at least half your weight in ounces of water every day. Get your 30 grams of fiber each day, to help stay clean in your gut. Then, eat as cleanly as possible, avoid sugars, artificial colors and flavors and go by the rule if it wasn't "food" a century or two ago, it still

isn't. Cleaning up your digestion is a primary way of speeding up your metabolism and also ensuring your health. The old adage that death starts in the bowel is apt.

The other aspect of speeding up your metabolism and staying healthy all lifelong is to exercise. The World Health Organization advocates that we should all get at least thirty minutes per day of aerobic exercise at a medium rate and at least a couple times a week get a good 45 minutes of anaerobic or resistance training in. This resistance training is especially important to maintain the muscle mass that is crucial for strength and to support your metabolism. Muscle mass uses food energy to move you, and fat of course does not. Exercise has many other benefits including correcting cholesterol ratios, improving lung capacity, regulating blood sugar levels and reducing high blood pressure, as well as making you fit, happy, strong and balanced. Live well, live long West Bend Residents!

ARCHITECTURAL CONTROL COMMITTEE

The (ACC) Architectural Control Committee must be informed if you are planning to change the exterior style, color, or have plans for additions or any removal to your property. A mandatory Architectural Review Form will need to be completed and signed. You may obtain this form on-line at www.ciaservices.com

Make Your Weight Loss Goals *a Reality*

(Family Features) Losing weight is a highly personal journey as a wide range of factors can affect a person's ability to do so. There's no one approach to weight loss; rather, the best approach is the one that fits your life and body best.

Get motivated to reach your weight loss goals with these expert tips.

Set realistic goals. Most experts agree you shouldn't lose more than 1-2 pounds per week. More rapid loss may shock your system, and chances are you're depriving your body of important nutrients. More aggressive loss is also less likely to be permanent or sustainable; long-term results generally come with steady loss over a period of time.

Eat well. Regardless what eating plan you choose, recognize the importance of nutrition in your weight loss program. Weight loss occurs when you burn more calories than you consume, so build your menu around nutrient-rich foods that fill you up. Strive for a well-balanced diet that encompasses all the food groups and, if necessary, discuss your goals with a doctor or nutritionist who can help you identify the best foods to enjoy and those to avoid.

Consider a supplement. If managing cravings or your appetite hinders your weight loss, a supplement may be a good solution. For example, RiduZone is a patented supplement that gives your body more of a substance it already creates called Oleoylethanolamide (OEA). In essence, OEA tells your brain you are full and it's time to stop eating. Developed and endorsed by Dr. Jay Yepuri, a board-certified gastroenterologist, the supplement is a non-stimulant that may help you feel full faster to reduce caloric intake and boost metabolism to burn stored fat.

Get active. Creating a calorie deficit is necessary to lose weight, and increasing your physical activity helps ensure you're burning calories. However, getting active isn't just about playing the numbers game. Physical activity also promotes overall wellness with numerous physical and mental health benefits, including improving circulation and stimulating feel-good endorphins.

Stay committed. It's easy to fall off your weight loss plan when unexpected circumstances arise. Give yourself a little grace and

permission for occasional misses so you stay motivated to get back to your program. That may mean waiting for a cold to pass and doing less strenuous workouts at home or making extra healthy choices at mealtime in advance of an indulgent event. To help make keeping your commitments easier, consider an option like RiduZone to boost your body's natural appetite-curbing power.

Find more information to help jump-start your weight management program at TryRiduZone.com.

What is OEA?

Oleoylethanolamide (OEA) is a metabolite of oleic acid, a naturally produced substance that interacts with appetite-controlling receptors in the small intestine to signal the brain you are full. It also helps boost metabolism. However, as a result of food choices and excess body fat, naturally produced OEA may require supplementation to achieve the desired effect on appetite or body fat.

Created to mimic this naturally occurring metabolite, RiduZone is the only weight management supplement that

contains OEA as an ingredient. Its production has been reviewed and is accepted as safe by the Food and Drug Administration.

Less fat

A clinical study published in the "Journal of Lipid Research" shows higher blood levels of OEA, which is derived from oleic acid-rich olive oil, correlate to lower amounts of body fat. This means weight loss results may be more visible.

Fewer calories

A prominent research study published in the journal "Food & Function" shows higher circulating levels of OEA can result in a significant reduction in calorie intake. Over time, OEA users become satisfied with smaller, healthier-sized portions.

Let Trends Guide Your 2020 Travel

(Family Features) While there's plenty to be said for taking the proverbial road less traveled, fellow tourists can provide a wealth of knowledge to help shape a vacation filled with lifelong memories.

Whether you expect your travel plans for 2020 to take you near or far, having a pulse on how and where others enjoy spending their travel time may help narrow down your options. Start planning your next getaway armed with the findings of a trend report compiled by vacation rental app and website Vrbo, especially when it comes to selecting a destination and your accommodations.

Unique Accommodations

Traditional vacation home favorites like beach houses, cabins and condos still reign supreme, but adventurous American travelers are staying in some unusual options. In fact, 71% of millennial travelers said they would consider staying at a non-traditional vacation rental.

In addition to barns, castles and treehouses, properties on wheels and properties that float join the ranks of unusual accommodations travelers are booking. Travel demand for houseboats, yachts, RVs and travel trailers is up 30% year-over-year.

Surf's Up

Portugal's reputation for affordability, primo surfing and sunshine-filled climate make the country a desirable place to explore. That may explain why seaside locales in Portugal took three of the top five spots on the list of hottest international beach destinations for American travelers. Chania, Greece, took the top spot, followed by three Portuguese destinations: Vila Nova de Gaia, Porto and Lisbon. Catania, Italy, rounded out the top five.

For those seeking to stay stateside, four of Vrbo's top five United States destinations this year are beaches, including: Gulf Shores, Alabama; Miramar and Rosemary Beach, Florida; Panama City Beach, Florida; and Maui, Hawaii.

Same-City Stays

Rental demand data in Chicago, Philadelphia, Dallas, Atlanta and a number of other urban destinations showed the single largest traveler origin market for each city was that same city.

"'Cele-cations,' when people seek accommodations to host and spend time with groups of family and friends for milestone events like weddings, birthdays and anniversaries, may be fueling the trend of people booking vacation homes in the same cities where they live," said Melanie Fish, Vrbo travel expert.

Also high on the trend list: short-stay, drivable destinations located within 300 miles of home.

Up-and-Coming Destinations

Their names may not be familiar to the masses,

but each of the top emerging domestic vacation destinations shares one thing in common: outdoor appeal. Places that appeal to families and other groups of travelers looking to explore the great outdoors are seeing a major surge over the past three years.

If an outdoor getaway is your ideal trip, consider destinations like Terlingua, Texas, located just a short distance from Big Bend National Park; Bella Vista, Arkansas, situated in the Ozarks near majestic lakes; Westport, Washington, surrounded by a bay to the east and the Pacific Ocean to the west; Cherry Log, Georgia, which sits in the heart of Chattahoochee National Forest; and Edisto Island, South Carolina, a charming beachside retreat 1 hour from Charleston.

"This is the third year in a row travelers' desire to be outdoors has filled the up-and-coming

destinations list," Fish said. "Clearly, people want the comforts of a home away from home while soaking in scenery."

Find the trends and accommodations that match your 2020 travel dreams at [vrbo.com](https://www.vrbo.com).

Cooking substitutions aid in calorie reduction

When looking to make permanent changes to a diet, consider using ingredient substitutions, said Roberta Anding, registered dietitian at BCM and Texas Children's Hospital.

Modifying the fat content in recipes gives the biggest calorie reduction, said Anding. Many times, applesauce can replace butter and oil in baking recipes, and Greek yogurt can replace sour cream.

Learning what substitutions work best does take some time and experimentation with cooking time and temperature, but reducing a diet by 100 calories per day can result in a 10-pound weight loss in one year, said Anding.

Other substitution options include switching to a low-fat cheese rather than a whole-fat cheese and switching from white bread and rice to wheat bread and brown rice. Not only is there a benefit in amounts of fiber, but also in magnesium, which can decrease the risk of type 2 diabetes.

"Don't look for extreme changes to your diet. Look for the common sense changes that you can make permanent," said Anding.

10 POWERHOUSE FOODS THAT WILL HELP YOU BURN FAT IN THE NEW YEAR

Marissa Balch - CPT, Nutrition Coach - Texas Fit Chicks Boot Camp

1. Oatmeal - Great source of soluble fiber and slow-digesting carbohydrates that will keep blood sugar and insulin in check so fat burning can stay high.

2. Eggs - A form of well-absorbed protein, healthy fats and Vitamin D (found in the egg yolk). Eggs also contain lecithin, which promotes healthy liver function, thereby helping the body to burn fat.

3. Salmon - High in omega-3 fatty acids, salmon reduces inflammation in the body and lowers LDL and triglyceride levels while raising good HDL levels. Salmon also has a beneficial effect on leptin (hunger hormone) levels in the body, which means it helps to suppress your appetite.

4. Nuts - Another source of fiber and rich in omega-3s, these fats help to regulate blood sugar and protect the heart and the immune system.

5. Grapefruit & Berries - These fruits contain slow-digesting carbs and are rich in fat-fighting fiber. Strawberries, raspberries, blueberries and blackberries all are loaded with soluble fiber and antioxidants that protect blood vessels and promote healthy blood

flow.

6. Avocado - It's got fat, yes, but the good kind! The monounsaturated fats found in avocado are burned readily for fuel during exercise and actually encourage fat burning. Good source of fiber and antioxidants.

7. Leafy Greens - Broccoli, specifically, is a fibrous carb that can make you feel full quickly—one reason why it's a great food for getting lean. Broccoli also contains phytochemicals that can help enhance fat loss.

8. Cinnamon - Helps to reduce blood sugar levels, which in turn prevents the body from storing sugar as fat. Add it to your oatmeal and yogurt to enhance flavor without adding calories.

9. Green Tea - Drink this! Not only is green tea packed with antioxidants, it also contains catechins, a phytochemical that helps speed up metabolism and burn more fat.

10. Beans & Legumes - Great sources of protein and they normalize insulin levels and help keep your blood sugar steady throughout the day. Black beans, Garbanzo beans, red beans and lentils are all great to incorporate into your diet.

Top Tips to Get Ready to Run

(Family Features) You've made the decision to get in shape, and whether your goal is a full marathon or simply a few laps around the neighborhood, there are a few steps to consider taking before you strap on those shoes and head toward the finish line.

Here are a few tips to help get you ready for the big race:

Seek Quality Sneakers - Feet come in a variety of widths and sizes, so visit a specialty running store to find perfect-fitting sneakers. These may come with a hefty price tag, but there are no shortcuts for comfort and support while running long distances.

Make a Schedule - Try to aim for at least 10 hours of training per week, including three days where you run and two or three days of other physical activity such as cycling or strength training. To avoid exhaustion, be sure to include at least 1-2 "rest" days per week.

Stick with Water - Avoid sports drinks that are loaded with preservatives and sugars. You can't go wrong with the hydrating power of water. As a rule, try to consume at least 6-8 ounces of water for every 20 minutes you run. Proper hydration after the run is also vital.

Go Online - Many websites have training guides for various skill levels or different types of races. If you have a smartphone, look for apps that can take you through day-by-day workouts to get you marathon-ready.

Nutrition - Filling your body with the proper amount of fuel can help ensure finish-line success. Load up on quality carbohydrates, such as beans, peas, whole-wheat pastas, whole-grain cereals, apples, brown rice and root vegetables. Protein also plays an important role in a runner's nutrition, so fill up on lean meats, fish, eggs, low-fat dairy, peanut butter and soy protein sources, as well.

By following these general rules, you'll be able to focus on achieving your goal and enjoy the thrill of finishing the race. Find more tips for a healthier lifestyle at eLivingToday.com.
