Christmas PARADE

Everybody loves a parade. So, let's have one!

Saturday December 5, 2020 at 4:00pm

With the Corona virus preventing us from having our annual Christmas on the Lake celebration, we have decided to have our first Christmas parade instead. The exact route is yet to be determined and will depend in part on how many participants we have. If you are willing to decorate your truck, car, golf cart, bike etc., we would love for you to be in the parade. We will provide beads and toys to throw.

Please email me, Terry Buckner at terry214@live.com, if you can participate so we can plan accordingly.

Updates and more details will be posted on NextDoor and in emails from Graham, our property management company.

COMMON GROUNDS PLANTINGS

Viola Mix

White Kale

Snapdragon Sonnet
Crimson

Dianthus Amazon
Rose Magic

Snapdragon
Montego Red

Calendula
Yellow

Dusty Miller
Silver Dust

BUILDING RESILIENCE AGAINST VIRAL ILLNESS

Medical literature is filled with highly credible studies that show the enormous benefits of certain alternative treatments. Scientific evidence shows that the immune systems of numerous people in the at-risk population can be effectively stimulated, thereby lowering their risk of serious illness and death.

These therapies include:

- High dose vitamin C
- Nano-curcumin
- Nano-quercetin
- Baicalin
- Green tea.

Let Us Not Underestimate The Diet For Resilience!

Here are some tips:

The **worst immune-suppressing foods** are sugars, high-glycemic carbohydrates and omega-6 fats. Sugar consumption can suppress cellular immunity for days.

- Omega-6 oils such as corn, safflower, sunflower, soybean, peanut and canola oils, powerfully suppress immunity and increase inflammation. Instead high-quality olive oil should be eaten with each meal. Olive oil contains two powerful antioxidants that improve blood flow.

- Adding turmeric powder to either olive or coconut oil which adds anti-inflammatory and antioxidant power.

- Artificial sweeteners also impair the immune system.

- Red meats can also be a problem during infections because of their high iron and high glutamate contents which can worsen an infection.

- Eating fresh vegetables with meats reduces iron absorption.

- If you chose to take vitamin C, try not to take with meals as it can dramatically increase iron absorption. Taking large amounts of iron during an active infection can lead to adverse reactions.

- Processed meats are some of the worst processed foods in the supermarket.

- White tea and green tea are the best teas to drink as they are high in healthy flavonoids.

Let Us Not Forget Exercise For Strength, Endurance, and Resilience!

A great number of studies have shown that moderate exercise improves immune function along with building endurance and strength. Resistance exercises combined with moderate aerobic exercise is a good regimen for maintaining health as well as immune resilience. Swimming, brisk walking, biking and weightlifting are all recommended.

There are so many lifestyle approaches to this nasty virus. If we eat properly, exercise and use our common sense we can still lead a happy and healthy life!
