## THE GREAT FISHERMAN

By Cheryl Conley, TWRC Wildlife Center

When one mentions raptors, there are a few species that people are very familiar with like owls, eagles and hawks. The osprey, however, isn't a familiar species to most people even though it is one of the most widespread raptors in the world. They are found on every continent except Antarctica.

Like all raptors, the osprey is a large bird

with a hooked beak and sharp talons, both of which are used to catch their prey and tear it apart to eat.

About 99% of the osprey's diet is made up of fish so it only makes sense that they nest near water along the coasts and large lakes. Occasionally they can be seen along rivers. They build their nests at the tops of dead trees, buoys, chimneys, and even atop power poles. Like the bald eagle, they use the same nest year after year but can be seen making minor repairs each spring.

They are amazing to watch as they glide over water looking for a fish. Sometimes they plunge so forcefully into the water that they are totally submerged. After catching a fish, they arrange the fish so it faces upright with the head forward.

The osprey is a great fisherman, successfully catching a fish one out of 4 tries. They have a much higher success rate than it's relatives like the eagle. Sometimes eagles watch and when an osprey catches a fish, the eagle will attack the osprey causing it to drop the fish. Easy meal for the eagle! Benjamin Franklin said in 1784 that "bald eagles are too lazy to fish for himself.....and does not get his living honestly." True then, true today.

Ospreys generally mate for life but they will find a new partner should their partner die or disappear during spring migration.

If you'd like to watch an osprey nest, there are many online. The Conserve Wildlife Foundation of New Jersey has an osprey cam that you can watch here: <http://www.conservewildlifenj.org/education/ospreycam/>. In the New Jersey area, nest building begins in early April and eggs are laid from mid-April to early May. You can watch the eggs hatch and observe Mom and Dad caring for the babies. It's interesting and educational.

TWRC Wildlife Center is a 501(c)(3) organization located in the Spring Branch area of Houston. Since 1979, we have been committed to providing quality emergency care and rehabilitation for injured, ill, orphaned and displaced wildlife. We are proud to be making a difference for the wildlife in our area.

## WELCOME

### *A Newsletter for Meridian residents*

The Monitor is a monthly newsletter mailed to all Meridian residents. Each newsletter is filled with valuable information about the community, local area activities, school information and more. If you are involved with a school group, play group, scouts, sports activity, social group, etc. and would like to submit an article for the newsletter you can do so online at [www.PEELinc.com](http://www.PEELinc.com) or you can email it [meridian@peelinc.com](mailto:meridian@peelinc.com). Personal news for the Stork Report, Teenage Job Seekers, special celebrations, birthday announcements and military service are also welcome. Our goal is to keep you informed!

## ADVERTISING INFO

Please support the advertisers that make The Monitor possible. If you would like to support the newsletter by advertising, please contact our sales office at 512-263-9181 or [advertising@PEELinc.com](mailto:advertising@PEELinc.com). The advertising deadline is the 9th of the month prior to the issue.

## NATURE WATCH

## A CHARM OF FINCHES

by Jim and Lynne Weber

*Lesser Finch*

At times, winter in Central Texas may seem a bit drab, colorless, and dreary, but the season is usually brightened by members of a beautiful and diverse group of birds called finches. These small, seed-eating birds have an undulating flight, and flocks of them often roam south in the winter.

Found primarily west of the Balcones escarpment, Lesser Goldfinches (*Spinus psaltria*) are present year-round, but are more likely to be seen at bird feeders in the colder months. At 4.5 inches long, males have an entirely black crown and back, white wingbars, and are lemon yellow below, while females have olive backs, black wings with whitish wingbars, and duller yellow underparts. They can gather in groups of up to several hundred at a time, and are most commonly found in Texas and California.

The American Goldfinch (*Spinus tristis*) is a slightly larger bird that is less common but typically present here from November to March. At 5 inches long, males have a bright yellow body, a black cap, and black wings with white wingbars. Females are duller overall, with an olive body and black wings with prominent white wingbars. They are the only finch that molts its body feathers twice a year, in late summer and then again in late winter in preparation for breeding season.

Most gregarious are the Pine Siskins (*Spinus pinus*), a 5 inch long finch with prominent brown streaking and yellow at the base of the tail and in flight feathers. At first they may appear mostly grayish-brown, but they flash their yellow markings as they explode into flight

or flutter while feeding. Typically present from December through March, flocks of Pine Siskins may congregate at bird feeders one winter and be completely absent the next. Their behavior is highly nomadic and their presence is erratic across North America in winter in response to available seed crops. In fact, some individuals may stay near a dependable food source and breed far south of their normal breeding range, which is in Canada, the northern U.S., and higher elevations of the west.

*Pine Siskin**American Goldfinch*

# THE MONITOR

The Monitor is a private publication published by Peel, Inc. It is not sanctioned by any homeowners association or organization, nor is it subject to the approval of any homeowners association or organization, nor is it intended, nor implied to replace any publication that may be published by or on behalf of any homeowners association or organization. At no time will any source be allowed to use The Monitor's contents, or loan said contents, to others in anyway, shape or form, nor in any media, website, print, film, e-mail, electrostatic copy, fax, or etc. for the purpose of solicitation, commercial use, or any use for profit, political campaigns, or other self amplification, under penalty of law without written or expressed permission from Peel, Inc. The information in the newsletter is exclusively for the private use of Peel, Inc.

Though this year was tough,  
I'm so grateful for these  
things in my life from 2020!

## LETTUCE RECYCLE!

by Dena Houston

### WHAT DO I DO WITH.....?

Each week, I receive recycling questions from the readers of "Lettuce Recycle". I love getting these questions and publish the questions and answers in future articles for all of my readers. One of my best tools is the City of Austin website called "What Do I Do With.....". Here is the link to the website: <http://www.austintexas.gov/what-do-i-do>. Type in the name of an item you want to recycle and the website will tell you how to recycle or dispose of it.

This is an amazing website and, in this crazy world of everchanging recycling guidelines and policies, it takes a lot of time and effort to keep it up to date. Kudos to the City for this wonderful recycling tool.

There is also a mobile app available for your phone and tablet. It is called "Austin Recycles" and was launched in April of 2020. After you type in your address, a calendar will pop up with all of your recycling collection dates. If you hit the search icon at the bottom, it brings up the "What Do I Do With" tool.

Below is a brief history and more information about "What Do I Do With":

- It was launched in 2015.
- Since it was launched, it has been viewed more than 612,000 times.
- This tool was built by a third-party partner, ReCollect. They work with many municipalities and provide these tools. They manage the coding, build-outs, and technical improvements.

The Austin Resource Recovery marketing representative manages this website in the following ways:

- Makes updates as needed when an item's recyclability changes or more recycling resources become available.
  - Posts news of facility changes (like when the Recycle & Reuse Drop-Off Center was closed temporarily during the pandemic).
  - For items not listed, adds information as it becomes available.
- The number of items added to this website increased more than 33% in the last year.

### QUESTION AND SUGGESTIONS FROM OUR READERS:

**HOW DO I RECYCLE PLASTIC COAT HANGERS?** – These can go into your blue recycling bin. Savers will take them for reuse; Goodwill will not.

**ARE SMALL PIECES OF PLYWOOD COMPOSTABLE?** They are not. The glue that holds the pieces of wood together makes them non-compostable. Put them into the trash bin.

**HOW DO I RECYCLE PLANT FLATS FROM THE NURSERY?** These can go into your blue bin. Be sure they are clean and dirt-free.

**REGLUE AUSTIN** was featured on KUT as a nonprofit organization that makes used PC's available to school children. Here is their website: <http://reglue.org/>

**INSIDE BOOKS PROJECT** donates books to Texas prisoners. Please check out their website for details: <https://insidebooksproject.org/donate-books>.

If you have any questions or recycling ideas, please send them to: [recycling@hpwbana.org](mailto:recycling@hpwbana.org).
